STANDING POLICY COMMITTEE ON PUBLIC WORKS

QUESTION PERIOD

Minute No. 700
Councillor Wyatt requested an update on the status of the graffiti policy to which Councillor Eadie replied that he thought it would be before Christmas but that he would take the question as notice and endeavour to obtain a more precise date for all Members of Council.

In noting that a 1 cent per litre rise in the cost of fuel would equate to a 150,000 dollar annual increase in the cost of fuel for Transit, Councillor Swandel inquired what impact that would have on the Public Works budget.

Councillor Eadie acknowledged that he was aware of the Transit figure but that he would request the administration to try and provide a projection of the impact for the other departments.

Councillor Swandel questioned if there was a stabilization mechanism for issues such as the rapid rise in fuel prices currently being experienced to which Councillor Eadie replied that it would be appropriate for the Federal Government to have such a policy but, as that they did not, neither did the City.
