

THE CITY OF WINNIPEG

BY-LAW NO. 7494/99

A By-law of THE CITY OF WINNIPEG to amend By-laws 1481/77 and 1573/77, being The City of Winnipeg Streets By-law and Traffic By-law, respectively.

WHEREAS the "Manual of Temporary Traffic Control in Work Areas on City Streets" is adopted as part of By-laws 1481/77 and 1573/77 being The City of Winnipeg Streets By-law and Traffic By-law, respectively;

AND WHEREAS the said Manual mandated that "Effective January 1, 1998, all retroreflective sheeting on signs, barricades and devices must be Type III (equivalent to High Intensity sheeting), and barricades must show diagonal cross-hatching";

AND WHEREAS the January 1, 1998 deadline referred to above, and the January 1, 1999 deadline extension as provided for in By-law No. 7139/97 of The City of Winnipeg, create an undue burden upon local contractors and The City of Winnipeg;

AND WHEREAS the Transportation Association of Canada has adopted black and orange vertical stripes instead of diagonal cross-hatching as a new Canadian standard for light traffic barricades;

NOW THEREFORE THE CITY OF WINNIPEG, in Council assembled, enacts as follows:

1. By-law No. 7139/97 of The City of Winnipeg is repealed.
2. That the requirement in the 1994 Edition of the "Manual of Temporary Traffic Control in Work Areas on City Streets" as adopted by Subsection 4.13.03(a) of By-law 1481/77 of The City of Winnipeg and by Section 16 of By-law 1573/77 of The City of Winnipeg, that "effective January 1, 1998, all retroreflective sheeting on signs, barricades and devices must be Type III (equivalent to High Intensity sheeting), and barricades must show diagonal cross-hatching" be deleted in its entirety and that the following be substituted therefor:

- (a) "until December 31, 2001, all retroreflective sheeting on signs, barricades and devices may be Type I (equivalent to Engineering Grade sheeting) or Type III (equivalent to High Intensity sheeting), and barricades may show diagonal cross-hatching or vertical stripes;
- (b) effective January 1, 2002, all retroreflective sheeting on signs, barricades and devices must be Type III (equivalent to High Intensity sheeting), and barricades must show vertical stripes."

DONE AND PASSED in Council assembled, this 22nd day of September, 1999.
