CCFM – CoolStreetsWPG 2022 – Bunn's Creek - Pedestrian Bridge Improvements

LDR Funding Request Items 1 to 6.

1. CoolStreetsWPG is a community project continuing for the sixth year (2022). Last summers' (2021) project saw new pedestrian bridge improvements to five bridges over the Seine River & three bridges over Bunn's Creek. The project saw a total of 8 artists and multiple volunteers spend a total of 500+ hours creating the murals which saw countless families, kids, daycares, running groups & bike tours explore and interact with the project.

   Thanks to the overwhelming success of the past five years of projects totaling thirty-two installations we continue to be encouraged by Winnipeggers to create new ephemerals works to keep motivating residents to actively explore our city, rivers & creeks in theses pandemic times. It is for these reasons that we are working to create a new 2022 edition of the project on the five Seine River bridges & three Bunn's Creek bridges with plans to expand to more neighbourhoods in the city.

2. A conceptual presentation has been provided to illustrate and recap our past project including the three 2021 Bunn's Creek murals in the Kildonan Ward. We will be reaching out in various ways to other community committees, community organizations & businesses for potential funding partners and sponsors to expand the scope of the project if possible.

3. We have submitted the conceptual presentation to councilor Jeff Browaty and look forward to his support. We will follow up for City of Winnipeg approvals to the various Public Works, Parks and Open Spaces Division and Engineering Division staff who provided past approvals. Specifically: Darren Burmey who provided approvals for the prior projects.

4. Scope of Work is to install child friendly designs on the 3 pedestrian bridge walking surfaces using approved designs and products as per any City of Winnipeg Parks and Open Space requirements. See provided .pdf for locations of project.

5. Labour & Materials = 6000$
   Signage, Marketing, Contest Materials & Cleanup/Removal = 1500$
   Preliminary Total 7500$

6. Installations are to happen in May/June dependent upon any spring flood waters.
   On-Site removal if and when required for any location by the City of Winnipeg would occur spring 2023.
