OxidizeIt Canada's Detergent-Less Laundry System

ABOUT US

What is Oxidize It?

A Detergent-Less Laundry System.

The Oxidize It detergent-less laundry system is going to change the way you do laundry forever. Our product eliminates the need for dangerous and chemically-laden detergents, softeners, and bleach. Our oxidization process delivers oxidized water to your washing machine which then penetrates your clothes with natures most powerful cleaning agents. This process lifts the dirt, bacteria, and odour right out of your soiled laundry 3000X more effective than bleach. In addition, you no longer need to heat your water (savings!) to do your laundry as the Oxidize IT system only uses regular cold water. This in turn means you can throw all your laundry into your washing machine at the same time no matter its colour or type. No more sorting! Washing and drying time will also reduce significantly and your clothes will last longer due to the elimination of soapy chemicals and detergents that destroy your material.

PROCESS

How it works

This groundbreaking technology transforms the cold water running into your household washing machine, infusing it with nature's most powerful cleaning

agents. Water treated with this advanced laundry system will have the top five most effective oxidizers known to man present and active, ready to deep clean your laundry. Some of the most respected hospitals and hotels in the world have been utilizing the science behind the Oxidize It™ Detergent-Less Laundry Solution for years to effectively clean their laundry. Now it's time for you to discover the benefits of this technology for yourself.

TESTIMONIAL

What customers say

ned the oxidize it for 2 years and am amazed at how it removes the odors from my dogs bedding. This was the most noticeable difference when I stopped using regular detergent to do my laundry. Towels smell fresh without the use of any deodorizers or scents, as if they have been dried outdoors. This is an enormous benefit in a home where we have sensitivities to strong odors.
