STANDING POLICY COMMITTEE ON

PROTECTION AND COMMUNITY SERVICES

QUESTION PERIOD

Minute No. 182
Councillor Vandal questioned if there was an evaluation in the works for red light cameras / photo radar, and when Council would know if the program was achieving what it was supposed to achieve.

Councillor Steeves noted that an audit process had recently been conducted on the photo enforcement program and advised the Councillor of the availability of the report.

Councillor Vandal further queried if people were slowing down where they were supposed to and if people were running fewer red lights than before the installation of the red light cameras, to which Councillor Steeves replied that some of that information was contained in the auditor's comments and report, and that he would provide the Councillor with everything that was available.
