STANDING POLICY COMMITTEE ON FINANCE

QUESTION PERIOD

Minute No. 605
Councillor Swandel noted that earlier this year, the City was able to do a significant number of additional street works as a result of projects coming in well under budget. He questioned if there were other capital projects coming in under budget and if that would free up monies for the 2009 budget or for projects planned in 2009 that might be started in 2008.

Councillor O'Shaughnessy replied that there will be a report coming in two weeks on capital works.

Councillor Swandel questioned whether or not there was a sense that there would be enough money there to build an active transportation connection to the University of Manitoba; to which Councillor O'Shaughnessy replied that he doubted it.
