STANDING POLICY COMMITTEE ON FINANCE

QUESTION PERIOD

Minute No. 348
Councillor Mayes referenced an initiative by Councillor Fielding pertaining to granular roadway improvements and questioned if Councillor Fielding could elaborate on his proposal.

Councillor Fielding noted the need to have gravel back lanes improved by getting them paved. He advised that in 2010, some money was put in the budget for that purpose and the lanes in the worst shape were identified and money was allocated for the paving of them. Councillor Fielding noted that a tender was put out late in the year, but the tender went unanswered. He further advised that monies were allocated in the budget again this year and if this year's tenders generated some good pricing, additional work might be done.
