STANDING POLICY COMMITTEE ON PROTECTION AND COMMUNITY SERVICES

QUESTION PERIOD

Minute No. 300
Councillor Havixbeck inquired if there was still no contract for the construction of the building of Fire Station No. 11. Councillor Fielding replied that he did not have an answer but agreed to get the information to all Members of Council.

Councillor Havixbeck advised that Fire Station No. 11 had a concrete base poured last summer and that was paid for last summer. She also added that the exterior appears built and inquired if no further payment had been made to the contractor since the concrete foundation payment; to which Councillor Fielding agreed to take the question under advisement.

Councillor Havixbeck asked what date the audit of the fire halls would be completed and a report provided to Council. Councillor Fielding stated that the audit was being handled by the Auditors and that was a question the Auditor could answer as they were administering the project.
