Subject: Lack of recreation infrastructure in South Winnipeg is unacceptable and my family does not support the proposed budget.

Mr. Carlos Gameiro,

My husband and I built and moved into Phase 1 in Bridgwater Forest at the end of 2010. We had a 2 month old baby then. That baby is now 7 years old and our second child is almost three. We have no school even though the space directly across our house was the "proposed school site". That is long and gone and housing will be developed there shortly.
Still no schools available so our son goes to a private school many kilometers away simply because there is no school near by and child care is available at the private school.
Now that we have learned that no funding for a rec centre in the south end , this is the FINAL straw.
Totally unacceptable.
Please listen to the thousands of people who live here as this is something that is necessary.
We have been lied to by the city and the province with this new neighbourhood.
City budget needs to find money and make this a priority.
