I am a resident of South Winnipeg and I am concerned with the lack of recreation infrastructure in our part of the city. I DO NOT support the proposed City budget as presented.

My family moved to Bridgwater Lakes in 2014 with the understanding that it could be a few years until there was a great rapid transit, schools, and a recreation facility including active living spaces, a library, and a place for the community to gather. We have dedicated significant time and energy to our neighbourhood association to help build relationships and a sense of community until this happens. We are very disappointed in the City's decision to exclude recreation funding from the budget for the foreseeable future.

It is too late to decide that the City does not want Waverley West. The decisions you are making today impact a population the size of our Province's second largest city. It is unfathomable that you continue to collect significant tax revenue from our community without providing the services readily available in other areas of the city.

I am unable to attend the EPC meeting due to work commitments but I understand that SWAT is speaking on this topic and I would like to register my support for their initiatives. Please ensure my support of recreation facilities in South Winnipeg is logged and considered by the Executive Policy Committee.

Thank you,
Heather Baker, CPA, CA
