Subject: To rezone Lot 1(parcel A) from an RM-4 to an RM-5 Multiple Family category and Lot 2 (parcel B) from an R2-T Transitional District to an RM-5 Multiple Family category and consolidate both lots in order to construct a new seniors retirement facility on the premises. The original building is to be retained.

Location: 321 & 325 De La Cathedrale
Legal Description: Lots 1& 2, Plan No. 43503, WLTO. in RL 76 Parish St.Boniface

Applicant: Sisters of The Holy Names of Jesus and Mary
Owner: same as above

Recommendation: (Approve with Conditions)

Site Description

The four story Residence Jesus-Marie heritage building is located at 321 Avenue De La Cathedrale on 1.43 acres of land. An adjoining 0.929 acre parcel to the east at Avenue 345 De La Cathedrale is also included in the application and is also currently owned by the Sisters of the Holy Names of Jesus and Mary. To the immediate north are lands owned and operated by the Louis Riel School Division. They are zoned R2-T Residential. Similarly, much of the property on the south side of De La Cathedrale is owned and operated by the Louis Riel School Division. It is also zoned R2-T Residential. Properties to the east along Rue Des Meurons are a mix of residential single family and some commercial (i.e. Caisses Populaire). To the immediate west is an existing and established residential neighbourhood zoned R2-T Residential. Parking for the existing structure is on the north side (rear) of the building. Primary access is via Avenue De La Cathedrale.

Background

The original convent was constructed in 1911 and has served as a home to the Sisters for close to a hundred years. The Sisters are however now in the process of moving to a newly renovated facility on nearby Rue Despins. The intention of the Developer, Caleb, is to retain (but) upgrade the existing structure and add a four story addition on the vacant lands to the east. The overall structure would then be utilized and operated as a seniors bilingual retirement community with a total of 152 independent living units.

Description of the Proposed Development

As outlined in the accompanying application, the developer Caleb, intends to provide (upon completion of the project) approximately 117,332 sq.ft. of total useable living area and common space. Common areas (57,328 sq. ft. of the total) would include a dining room, a family room, a library, games room , fitness room and salon/barber shop. With respect to the suite breakdown, there are 84 studios, 63 one bedrooms, and five two bedrooms currently proposed; they range in size from 257 sq. ft. to 900 sq. ft. in area. The developers make it clear that persons requiring assistance with the basic necessities of life such as hygiene, feeding, grooming, and medication management would be welcome in the proposed community. However they would be responsible to arrange for their own home care. The facility is not designed to provide anything beyond minimal health care. The project will provide 30-35 full time and part time staff. There will be a maximum of eighteen people on a work shift. The site will be fully landscaped and new walking paths and security lighting is to be provided. Thirty six (36) parking stalls are to be provided on the west and north sides of the existing building.

Analysis

The Planning and Land Use Division , in conjunction with other City Departments, has been actively involved with Caleb throughout the initial application process. Caleb, to their credit, has , from the outset, worked cooperatively with the City, the area residents and other interest groups to explain concisely and clearly their vision for the subject property. As a result of their efforts

through and well advertised and well orchestrated open house process, many initial concerns and/or questions regarding the details of the proposed development were more than adequately addressed right at the outset. It is the opinion , of this Division, that the proposed development helps to address a growing need for more senior's housing in the St. Boniface area. Currently the focus of much of the senior's housing construction has been concentrated in South St. Vital. More construction, of this type is needed in north and central St. Boniface to allow aging area residents to remain in their community close to their churches and other cultural facilities.

The building design is clearly innovative and interesting and was well received at the open house. The architects have endeavored to ensure that the new addition compliments and is in character with the existing building which is , of course, a part of the historical landscape in old St. Boniface. A traffic study done by Stantec, clearly indicates that the proposed facility will have minimal or no impact on the surrounding street network. The City concurs with Stantec's assessment that no traffic mitigation measures are warranted for the proposed development.

The Planning and Land Use Division therefore endorses the proposal for redevelopment of the subject parcels at 321 & 345 De La Cathedrale for a fully bilingual independent living facility.

Recommendation

The Planning and Land Use Division recommend approval for the following reasons:

- The proposed use both helps to address a much needed deficiency of Senior's housing in central St. Boniface but it also assures that an aging Heritage building will be upgraded and preserved.
- The nature of the proposed use suggests that there will not be any adverse traffic impacts on neighbouring streets.
- A significant amount of effort has been made to ensure that the design of the building itself remains in character with other buildings of similar age in the neighbourhood.
-
