STANDING POLICY COMMITTEE ON PUBLIC WORKS

QUESTION PERIOD

Minute No. 585

Councillor Swandel referenced the recent problems with the City's sewer system and flood protection. He noted the huge increase in recent years of high summertime water levels and questioned if the administration could recommend improvements to the system that would address what appears to be something that will have to be dealt with on an ongoing basis to which Councillor Eadie advised that he would raise the matter with the administration.

Councillor Swandel questioned what impact the backlog in tree pruning had on the damage to trees and the subsequent cost of clean up, to which Councillor Eadie replied that the Committee would ask for a report on the matter.

Councillor Smith questioned why the air conditioning system is disconnected on buses bought by the City to which Councillor Eadie replied that he thought it was due to the tender requirements which do not call for air conditioning on the buses, but that he would get more detail from the Director of Transit.
