Re: Proposed Amendments to the Planning, Development and Building Fees By-Law 166/2004

For submission to: **Standing Policy Committee on Property and Development**

Original report signed by: **Director of Planning, Property and Development**

Report date: **May 25, 2005**

Recommendation(s):

1. That the proposed By-law, attached to this report, be approved to amend the Planning, Development and Building Fees By-law No. 166/2004.

2. That the proper officers of the City be authorized to do all things necessary to implement the foregoing.

REPORT SUMMARY

Key Issues:

The overall intent of the proposed amendments is to correct errors, omissions and inconsistencies and to provide wording clarification as to the intent of fee applications for external customers and Planning, Property and Development Department staff. For the most part, fees have not been altered; the amendments typically reflect existing practice. Other than new fees for voice data systems, where some alteration of fees has taken place, the fees have been reduced.

Implications of the Recommendation(s):

General implications:

	None
	For the organization overall and/or for other departments
X	**For the community and/or organizations external to the City of Winnipeg**
	Involves a multi-year contract

Comment(s):

Provides clarification as to the intent and application of the proposed amended fees. Ensures that costs associated with providing review, permit and inspection processes for "voice data systems' are recovered (proposed amendment to section 89**).**

Policy implications:

	No
X	**Yes**

Comment(s):

The proposed amendment of s. 134 reinstates the authority of the Standing Policy Committee to refund or waive fees for non-profit and charitable organizations or in situations were it would be unfair to charge the full fee. A similar authority was previously contained in Development Fees By-law No. 6965/97.

Environmental implications:

X	**No**
	Yes

REASON FOR THE REPORT:

City Council has authority to make final decisions on matters requiring the enactment of a by-law.

HISTORY:

The Planning, Development and Building Fees By-law, 166/2004, came into effect in February 1, 2005, and imposes planning, development and building fees.

DISCUSSION:

The overall intent of the proposed amendments is to correct errors and omissions and provide wording clarification as to the intent of fee applications for external customers and Planning, Property and Development Department staff. For the most part, fees have not been altered; the amendments typically reflect existing practice. Other than new fees for voice data systems, where some alteration of fees has taken place, the fees have been reduced.

Some notable changes:

- The proposed amendments to sections 26, 71, 96, and 97, provide for a fair and equitable means of applying fees for services provided regarding special events and the erection and use of tents in conjunction with these special events. The result is a reduction in fees where an application applies to erect more than a single tent.

- The proposed amendment to s. 89 (fees for voice data systems) reflects the ever-changing technology in the construction industry and the needs of the industry in conjunction with plan review, inspections and issuance of permits.

- The proposed amendment to s. 134 reinstates the authority of the Standing Policy Committee on Property and Development to refund or waive fees for non-profit and charitable organizations or in situations were it would be unfair to charge the full fee. A similar authority was previously contained in Development Fees By-law No. 6965/97.

Financial Impact Statement **Date:** May 25, 2005

COMMENTS:

The recommendation contained in this report is that Council enact the attached draft by-law to amend the Planning, Development and Building Fees By-law No. 166/2004. While there would be a financial impact, should the draft by-law be enacted, in terms of refunded or waived fees for non-profit and charitable organizations and/or additional revenues from fees for voice data systems, the estimated net financial impact associated with this recommendation is not considered to be material.
