Agenda - Executive Policy Committee - December 7, 2005

Report - Standing Committee on Fiscal Issues - December 6, 2005

Moved by Councillor

That Rule 9.3 of the Procedure By-law be suspended in order that the following item, which was received too late to be placed on the regular agenda, be considered by Committee.

Item No. 3 Deficit Avoidance - Fiscal Stabilization Reserve and Mill Rate Stabilization Reserve Funds
File FE-1

STANDING COMMITTEE RECOMMENDATION:

On December 6, 2005, the Standing Committee on Fiscal Issues concurred in the administrative recommendation outlined in the report from the Chief Financial Officer dated December 1, 2005, and submits the following to Council:

1. That the Fiscal Stabilization Reserve forgo the amount of revenue earned during 2005 in excess of budget relating to net supplementary taxes and tax roll adjustments up to the amount required to avoid a deficit in the General Revenue Fund.

2. That the Fiscal Stabilization and Mill Rate Stabilization Reserves forgo their 2005 interest earnings up to the amount required to avoid a deficit in the General Revenue Fund.

3. That the total amount exceeding budget relating to the 2005 snow clearing program budget beyond the amount transferred from the Snow Clearing Reserve be funded from the Fiscal Stabilization Reserve as an unforeseen expense.

4. That the transfer from the Fiscal Stabilization Reserve to the General Revenue Fund for the year-ended December 31, 2005, be the amount required to avoid a deficit in the General Revenue Fund up to the maximum amount of the snow clearing budget shortfall net of the transfer from the Snow Clearing Reserve.

5. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

Agenda - Executive Policy Committee - December 7, 2005

Report - Standing Committee on Fiscal Issues - December 6, 2005

DECISION MAKING HISTORY:

STANDING COMMITTEE RECOMMENDATION:

On December 6, 2005, the Standing Committee on Fiscal Issues concurred in the administrative recommendation outlined in the report from the Chief Financial Officer dated December 1, 2005, and submitted the matter to the Executive Policy Committee and Council

Further, on December 6, 2005, the Standing Committee on Fiscal Issues filed the report from the Chief Financial Officer dated November 7, 2005.

On November 8, 2005, the Standing Committee on Fiscal Issues laid over consideration of the matter (administrative report dated November 7, 2005) to its meeting to be held on December 6, 2005.

ADMINISTRATIVE REPORT

RE: Deficit Avoidance – Fiscal Stabilization Reserve and Mill Rate Stabilization Reserve Funds

FOR SUBMISSION TO: Standing Committee on Fiscal Issues

ORIGINAL REPORT SIGNED BY: Chief Financial Officer

REPORT DATE: December 1, 2005

RECOMMENDATIONS:

(1) That the Fiscal Stabilization Reserve forgo the amount of revenue earned during 2005 in excess of budget relating to net supplementary taxes and tax roll adjustments, up to the amount required to avoid a deficit in the General Revenue Fund;
(2) That the Fiscal Stabilization and Mill Rate Stabilization Reserves forgo their 2005 interest earnings up to the amount required to avoid a deficit in the General Revenue Fund;
(3) The total amount exceeding budget relating to the 2005 snow clearing program budget beyond the amount transferred from the Snow Clearing Reserve, be funded from the Fiscal Stabilization Reserve as an unforeseen expense; and
(4) The transfer from the Fiscal Stabilization Reserve to the General Revenue Fund for the year-ended December 31, 2005, be the amount required to avoid a deficit in the General Revenue Fund up to the maximum amount of the snow clearing budget shortfall net of the transfer from the Snow Clearing Reserve.

REPORT SUMMARY:

Key Issues:

A 2005 deficit is being projected in the General Revenue Fund. The initiatives identified to avoid a deficit require Council approval.

Implications of the Recommendation(s):

General implications:
X **None**
☐ **For the organization overall &/or for other departments**
☐ **For the community and/or organizations external to the City**
☐ **Involves a multi-year contract**
Comment(s):

Policy implications:
X **No**

☐ **Yes** **Comment(s):**

Environmental implications:
X **No**
☐ **Yes** **Comment(s):**

Human Resources implications:
X **No**
☐ **Yes** **Comment(s):**

Financial implications:
☐ **Within approved current and/or capital budget**
X **Current and/or capital budget adjustment required**
Comment(s): Reduces the Stabilization Reserves' - Fiscal Stabilization Reserve and Mill Rate Stabilization Reserve - retained surplus. The reduction will impact the pace of increase in the Stabilization Reserves as approved in the Financial Management Plan.

REASON FOR THE REPORT:

As at August 31, 2005, the City forecasted a 2005 General Revenue Fund deficit of $17.0 million. Based on the forecast the Administration identified several deficit avoidance initiatives. Some of the initiatives were: delaying the filling of vacant positions; curtailing discretionary spending, and the transfer of funding from City of Winnipeg Funds to the General Revenue Fund. Council approval is required for the transfer amongst funds.

HISTORY:

On December 17, 1997, Council approved Clause 1 of the report of the Standing Committee on Fiscal Issues, which requires that the Standing Committee on Fiscal Issues approve a periodic Financial Status and Forecast report. The December 31, 2005 Financial Status and Forecast report based on actuals for the eight month period ended August 31, 2005 was presented at the October 11, 2005 meeting of the Standing Committee on Fiscal Issues. The report identified a $17.0 million forecasted deficit. The deficit was partially the result of a $9.3 million budget shortfall in snow clearing.

DISCUSSION:

Recommendation (1)

As noted below, any amounts earned beyond budget in respect of net supplementary taxes and tax roll adjustments must be transferred to the Fiscal Stabilization Reserve. The recommendation requests Council's approval to forgo transfer of these amounts to the Reserve up to the amount required to avoid a deficit in the General Revenue Fund.

Recommendation (2)

The City of Winnipeg operates a centralized treasury function with a single operating bank account in the General Revenue Fund. Consequently, the Stabilization Reserves – the Fiscal Stabilization Reserve and the Mill Rate Stabilization Reserve – do not have a separate bank account. Cash transactions are credited or charged to the "Due from the General Revenue Fund" in each reserve. Interest revenue is credited to the reserves based on the City's average short-term earnings. This recommendation increases the interest revenue in the General Revenue Fund by forgoing interest revenue in the Stabilization Reserves up to the amount of the deficit after first applying recommendation (1).

Recommendations (3) and (4)

On May 16, 1973, Council approved the creation of the Future Tax Levies Reserve Fund to counteract the budgetary effects of fluctuations from year to year in tax revenue caused by additions to and deletions from the tax roll due to new construction, demolitions or improvements to land. On March 20, 1997, Council approved the name of the fund be changed to the Fiscal Stabilization Reserve and it was subject to the following financial regulations with respect to the use of the fund:

- No transfers from the Reserve be made to the General Revenue Fund to fund current operations;
- The current funding arrangement through net taxes added be maintained;
- The target level of the Reserve be established at a minimum level of 5% of the General Revenue Fund's adopted budget expenses;
- Once the Reserve balance exceed 5% of the General Revenue Fund's adopted budgeted expenses, the excess amount be considered for utilization only to provide for major unforeseen expenses; and
- The use of these funds in any given year be limited to no more than 20% of the prior year's Reserve balance.

On December 13, 2000, Council approved that the regulations governing the Fiscal Stabilization Reserve be amended to provide for transfers to or from the reserve to offset any variances in the tax projections used in the development of the annual estimates and the actual amounts billed in the spring of each year.

On May 23, 2001, Council again amended the above regulations. Beginning in 2002, the Reserve is limited to interest earned and the revenue from net supplementary taxes added in a year is recorded as revenue in the General Revenue Fund. Council also added a provision for the use of any surplus after the Stabilization Reserves reach a combined total of 10% of Tax-Supported expenditures as being available for one-time expenditures.

During 2001, $7.0 million was transferred to the Fiscal Stabilization Reserve from the Pension Stabilization Reserve. The purpose of the Pension Stabilization Reserve was to support general operating expenditures thereby reducing the amount of revenue to be raised through property taxation, in order to share the benefits of the surplus with the citizens of Winnipeg. The use of funds from the Reserve was contingent upon approval by Council. Including the $7.0 million contribution, the Fiscal Stabilization Reserve had a retained surplus balance as at December 31, 2001 of $32.5 million.

On March 22, 2005, Council approved a report from the Executive Policy Committee to further amend the regulations of the Fiscal Stabilization Reserve to permit transfers to or from the Reserve to offset any variance in the revenue projections for net supplementary taxes used in the budget and the actual amounts achieved. As at December 31, 2004, the balance in the reserve totaled $34.7 million.

Over the past two years, there has been a significant amount of unexpected snowfall in the Winnipeg area. The budget for snow clearing in 2004 and 2005 respectively was $13.7 million and $14.1 million. Actual expenses incurred in 2004 totalled $22.7 million and projected 2005 expenses will likely be in the range of $23.4 million. In 2004, the City transferred $6.1 million from the Snow Clearing Reserve to reduce the General Revenue Fund deficit. Council passed a motion on October 11, 2005 to transfer the balance remaining in the Snow Clearing Reserve of approximately $3.3 million to reduce the General Revenue Fund deficit for the year ending December 31, 2005, if required. After the expected 2005 transfer, there would still be a shortfall in funding for snow clearing expenses of approximately $6 million.

The budget shortfall in the snow clearing accounts represents an unforeseen occurrence that could be offset by funds available in the Fiscal Stabilization Reserve. Prior to 2001, the reserve could be used for unforeseen expenses if the reserve balance exceeded 5% of the General Revenue Fund's budget. As noted above, a further $7.0 million was transferred from the Pension Stabilization Reserve. Prior to this transfer, there were no spending limitations on the $7.0 million other than Council's approval. It is therefore recommended that the Fiscal Stabilization Reserve's retained surplus, in particular the amount transferred from the Pension Stabilization Reserve fund the snow clearing budget shortfall if the deficit exceeds the amount of interest forgone by the Stabilization Reserves.

If Council approves the recommendation, it will impact the Financial Management Plan adopted by Council on April 25, 2001. The Plan outlines seven key financial goals. One of the goals is to "Ensure Adequate Reserves" with a target that the City's Stabilization Reserves are to be at a minimum of 10% of Tax-Supported expenditures by 2009 on a combined basis or approximately $70.7 million based on the 2005 Tax-Supported budget. As at December 31, 2004, the Fiscal

Stabilization Reserve balance was at a level of 5% of Tax-Supported expenditures, while the Mill Rate Stabilization Reserve was at 4.0% for a combined 9.0% or $62.3 million. Any significant draw on either of these reserves will make achieving this goal difficult.
