Subject: Parkland

To the EPC,
I am speaking in favour of keeping the Corydon/Osborne Parkland ares as a green space. We don't need anymore "housing/business " development in this area. Human beings need more green space, outdoor spaces to walk in and nature to enjoy.You need to start thinking in terms of people's needs, mental health and listen to what people want not what developers are telling you to do to make money for the already rich. We don't need more CONCRETE in our city -instead we need more grass, trees, flowers and places for birds to feel safe. These features do marvellous things for our mental health.
Please do not make another stupid mistake in giving up this parkland space for developers. Our already "spread out" city has proven a disaster. You keep approving new projects and don't fix up the infrastructure of our present city. Do you want it to fall apart completely?
Sincerely,
Carol Ann Coish
