Delegation information
Committee: Executive Policy Committee
Committee - council: N/A
Committee - other: N/A
Agenda item (number and title): Public Service Report for the purchase of smart water meters

Service inquiry: Submit Comments in writing
Participation preference: N/A
Comments in writing: This $ 135 Million smart meter installation project should not go forward until the report from Diameter Services is made public. The Public Report submitted does not have enough information regarding what the emissions from these meters will be like - will they emit all of the time and send out signals occasionally? What is the cost of the IT components?

Perhaps this item should be suspended until the Diameter Report is available to Councillors and the public for examination and comment.

Thank You
Gilles Lamoureux
