Agenda – Standing Policy Committee on Water, Waste and Environment – March 2, 2026

REPORTS

Item No. 2 Construction Waste Diversion Strategy

WINNIPEG PUBLIC SERVICE RECOMMENDATION:

The Public Service requests that an extension of time of up to 90 days be granted to report back with recommendations for implementing a construction and demolition waste reduction strategy for the City of Winnipeg.

DECISION MAKING HISTORY:

STANDING COMMITTEE RECOMMENDATION:

On September 9, 2025, The Standing Policy Committee on Water, Waste and Environment concurred in the recommendation of the City Centre Community Committee, and directed the Winnipeg Public Service to:

1. Review best practices from other Canadian municipalities regarding contractor construction and demolition waste diversion strategies, including mandatory recycling, material reuse, and waste-reduction incentives;

2. Work with the Climate Action and Resilience Committee to assess policy options and provide guidance on integrating waste reduction into broader emissions reduction efforts;

3. Explore potential regulatory and policy tools—such as mandatory source separation, diversion targets, and penalties or incentives for compliance—to reduce contractor-generated waste going to landfill;

4. Report back to Standing Policy Committee on Water, Waste and Environment within 180 days with recommendations for implementing a construction and demolition waste reduction strategy for the City of Winnipeg.

NOTICE OF EXTENSION REQUEST

Title: Construction Waste Diversion Strategy

Critical Path: Standing Policy Committee on Water, Waste and Environment

AUTHORIZATION

Author	Department Head
M. Gordichuk Manager of Solid Waste Services	T. W. Shanks, M. Eng., P. Eng. Director, Water and Waste Department

RECOMMENDATION

The Public Service requests that an extension of up to 90 days be granted to report back on the following:

1. Report back to Standing Policy Committee on Water, Waste and Environment within 180 days with recommendations for implementing a construction and demolition waste reduction strategy for the City of Winnipeg

REASON FOR THE EXTENSION

The Province of Manitoba undertook a review of construction waste management within the province. Recommendations from that review will guide municipalities in their own management practices. The Public Services is requesting an extension for the City report in order to align with results of the Provincial review when they are made public.

DECISION MAKING HISTORY

ON September 9, 2025 the Standing Policy Committee on Water, Waste and Environment concurred in the recommendation of the City Centre Community Committee, and directed the Winnipeg Public Service to:

1. Review best practices from other Canadian municipalities regarding contractor construction and demolition waste diversion strategies, including mandatory recycling, material reuse, and waste-reduction incentives;

2. Work with the Climate Action and Resilience Committee to assess policy options and provide guidance on integrating waste reduction into broader emissions reduction efforts;

3. Explore potential regulatory and policy tools—such as mandatory source separation, diversion targets, and penalties or incentives for compliance—to reduce contractor generated waste going to landfill;

4. Report back to Standing Policy Committee on Water, Waste and Environment within 180 days with recommendations for implementing a construction and demolition waste reduction strategy for the City of Winnipeg.
