Subject: Plan Winnipeg Amendment - North South Transcona Route Alignment

Regarding the new 4 lane roadway

There are too many children who cross here with the parents/grandparents to go to school. This is their only access to Bernie Wolfe School.
To think that these people can use a sky walk or cross walk is absolutely absurd.
Tiny siblings are also brought in strollers, toboggans.
Doesn't Mr. Wyatt realize it is important for these people to stay safe?
A sky walk would be too slippery for anyone to climb in the winter.
A cross walk, kids would not pay attention to it, as they would cross this dangerous road out of impatience. Drivers do not pay attention either.

This also reduces the price when reselling a home. Thinking when a person buys a home it is a good place to live. Does Mr. Wyatt have any plans in rebursing these people if they loose money on a home?

Why didn"t Mr. Wyatt come to Bernie Wolfe School to tell the people and explain to them if he really cares about the people in this community? These people are directly affected by it. Maybe he should come himself one day and take the same route these small children take and help instead of hinder them.

There are also playgrounds in this area that are constantly in use by the children in this area and the children closer to Bernie Wolfe School. As this is where the children from near and far meet and play. Mr. Wyatt does not seem to realize this is a real community. This corridor will divide the community. These parks help the children stay safe from any traffic. They also ride their bikes there.

Respectfuly,
Sandra Reid
