Subject: Opposition to amendment of Plan Winnipeg
Hello;

I would like to advise the councillors that I am in opposition of any amendment to Plan Winnipeg that would enable development of Waverly West as a subdivision. Statistics Canada and historic population trends estimate that we will need 30,000 building lots by 2020. Currently, according to a recently released report by the City of Winnipeg, we have an inventory of 23,000 building lots. In addition to that number we also have residential friendly land once occupied by Kapyong Barracks, Molson Brewery and Fort Rouge Yards. It is well known that mixed housing is a far better strategy for the long term health of a community, rather than up-scale suburban development, that only serves to further segregate our community.

Yours truly,

Kim Milne

Winnipeg, MB
