Agenda - Executive Policy Committee – September 21, 2006

Moved by Councillor

That Rule 9.3 of the Procedure By-law be suspended in order that the following item, which was received too late to be placed on the regular agenda, may also be considered by Committee at this time.

ADDENDUM REPORTS

Item No. 21 King's Park Drainage Project - Land Dedication Reserve
File EP-2

COMMUNITY COMMITTEE RECOMMENDATION:

On September 19, 2006, the Riel Community Committee recommended to the Executive Policy Committee:

1. That funding to assist with the cost of the King's Park Land Drainage Project, in the amount of $3,000.00, be allocated from the Riel Land Dedication Reserve to the Richmond Kings Community Club.

2. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

DECISION MAKING HISTORY:

COMMUNITY COMMITTEE RECOMMENDATION:

On September 19, 2006, the Riel Community Committee recommended:

1. That funding to assist with the cost of the King's Park Land Drainage Project, in the amount of $3,000.00, be allocated from the Riel Land Dedication Reserve to the Richmond Kings Community Club.

2. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing,

and submitted the matter to the Executive Policy Committee.

Marc, Norm Fear is aware of the details and has signed off already. Also, Chris Trupish was in on the original consultation to provide any flood protection feedback. I've copied them to make sure they are in the loop as we proceed. JS

HI Marc,

The Kings Park project relates to the alteration of two berms which separate the west softball diamond from the soccer field and the soccer field from the east baseball diamond. After the 1997 flood, a dike was installed on the northern boundary of the Kings Park. At the same time, the excess clay that was utilized in the flood proofing process was positioned between the three fields to provide a better viewing area for the spectators. It was a great idea but as a result of the berms being joined to the north dike, the natural flow of water during rain storms was trapped at the northeast corner of each field. This in turn made the fields unplayable for 5-7 days.

The solution to the problem is merely excavating a swale, approximately 4 feet in width, at the northern point of each berm. This excavation will not alter the dike but will allow the water to naturally drain in a northeast direction towards the river.

Should you have any questions or require additional information do not hesitate in contacting me.

Thanks.

Murray

Hi Mr. Harding,

To make the grant approval process go a little smoother, could you please provide me with some further information. Is it for the construction/alteration of a berm (s) and, if so, what is the purpose of said berm(s). Thanks,

Marc Pittet

Hi Jake,

How have you made out with the quotation for the adjustment of the burms at Kings Park?

I thought I had sent you an email with my address but, by the looks of it, someone else may have received it as I failed to insert the "d" in your address.

Talk to you soon.

Murray Harding
