Re: DASZ 1/2024

An extension for time is being requested for the above noted Subdivision as we were unable to proceed with the filings within the required time. As a result of other projects, the owners/and their counsel were for forced to dedicate their time to other pressing matters.

Note that the requisite easement and grant of right of user have been executed and we are awaiting release of the Mylars pursuant to the release of condition letter. As soon as same are received, the Registrations will be filed within Land Titles to complete the Subdivision Registrations.

We anticipate this to be completed within the next matter of months, however, kindly request a one year extension.

Yours truly,

Levene Tadman Golub Law Corporation
