Recommendation: Approval

Report Summary:

- **Redevelopment of a vacant and boarded multiple-family building to create 22 housing units**
- **The proposed redevelopment will provide safe, quality housing for the community;**
- **The proposed development provides for the rehabilitation of an existing structure which is on the Historical Buildings Inventory**
- **The proposed rezoning and site design are compatible with the surrounding community in scale, the intensity of development, and the nature of the use;**
- **The proposed rezoning advances Plan Winnipeg and its policies;**
- **The proposed rezoning will not create an adverse effect on the amenities, use, safety and convenience of the adjoining properties and adjacent area;**

Site Description

The subject property, which is zoned "R2" Residential, is located on William Avenue between Isabel Street and Gertie Street in the Centennial neighbourhood of the Point Douglas ward.
North: Residences zoned "R2" Two-Family Residential
South: Vacant lot zoned "C1" Commercial
East: Residences zoned "R2" Two-Family Residential
West: Residences zoned "C2" Commercial

Description of the Proposed Development

The existing three-storey multiple family dwelling, which is on the Historical Buildings Inventory, has been vacant and boarded since 2003.

The applicant recently acquired the property and is undertaking to completely rehabilitate the building in order to reestablish 22 dwelling units. The units, which range in size from 500 square feet to 894 square feet, include a mix of fifteen (15) one bedroom and seven (7) two bedroom units.

The building previously had 23 dwelling units as a non-conforming right. However, in light of the fact that the building was vacant for several years, non-conforming rights to these units were lost.

The applicant has indicated that the dwelling will have a live in caretaker and will be marketed primarily to students from Red River College, which is just down the street.

Analysis

Plan Winnipeg Compliance

The subject application constitutes redevelopment within a Neighbourhood Policy Area. Neighbourhood Policy Areas are intended to include a residential mix together with a variety of educational, recreational, institutional, commercial and possibly industrial uses, at a scale and density compatible with each other.

In addition, this development meets several key goals of Plan Winnipeg including *supporting neighbourhood revitalization* (1B-01iv) *facilitating the provision of safe and affordable housing* (1C-01), and *promoting compact urban form* (3A-02).

In that vein, there is a recognition that adaptive reuse of existing buildings maximizes the use of existing infrastructure, helps revitalize existing neighbourhoods, and preserves older structures, which helps us sustain our architectural heritage.

City of Winnipeg Housing Policy
This project falls within the stated goals of the Winnipeg Housing Policy, which include enhancing neighbourhood stability and integrity, increasing property assessments, providing affordable accommodation and generally improving the overall health of Winnipeg.

Compatibility with existing neighbourhood and surrounding uses
The boarded up building is situated among both single-family and multiple-family residences and several older commercial buildings.

The building, which has been vacant for some time, is seen as a hazard and blight in the neighbourhood and its redevelopment for housing will improve its overall compatibility with the area.

The property is currently zoned "R2" Two-Family Residential. Because the building has been vacant for some time, any non-conforming rights which it may have held have been lost.

Consequently, a rezoning is necessary in order to redevelop and reutilize the existing structure.

Basement suites
Four of the dwelling units being proposed are in the basement. Typically, units in the basement are not desirable because of less natural light and air circulation and difficulty with mold. However, the Planning and Land Use Division has inspected the basement suites and verifies that each suite, which is slightly above grade, has several windows and receives a generous amount of natural light and air. With respect to mold, the applicant has indicated that there was a mold problem in the past but that he has undertaken to have it all removed.

With that said, final verification of the suitability of these units will be determined by the City of Winnipeg Health Department prior to occupancy.

Recommendation

The Planning and Land Use Division recommends approval for the following reasons:

- **The proposed redevelopment will provide safe, quality housing for the community;**
- **The proposed development provides for the rehabilitation of an existing structure which is on the Historical Buildings Inventory**
- **The proposed rezoning and site design are compatible with the surrounding community in scale, the intensity of development, and the nature of the use;**

- **The proposed rezoning advances Plan Winnipeg and its policies;**
- **The proposed rezoning will not create an adverse effect on the amenities, use, safety and convenience of the adjoining properties and adjacent area;**
