Dear Monika,

Please find attached a Community Incentive Grant Program Application for the land drainage project that has been authorized by the Planning, Property and Development Department (PPDD) of the City of Winnipeg.

The goal of this project is to eliminate the pooling of water on the east and west baseball diamonds and the soccer fields at the Richmond Kings Community Centre's, Silverstone site. Each year this problem has limited the use of the fields identified and forced the two sports to search out alternate sites in order to complete their schedules. It has also inconvenienced many residents of the area who normally cross the west fields on their route to and from the University of Manitoba.

I have attached a copy of the preliminary estimate provided by Jurgen Friesen of the PPDD. This document has also been forwarded to Norm Fear, who is ultimately responsible for the fields that RKCC sports teams utilize in the immediate area. The preliminary estimate for the project is $ 43,006.32. In the CIGP application I have identified a total cost of $ 45,000.00 as this project may also involve additional corrective landscaping that cannot be determined until the drainage system is put in place.

I realize the normal procedure in securing the grant is to provide quotations from three separate companies. However with the complexity of this project, the PPDD will secure the company that is able to provide the experience necessary for positive results. Naturally, the project's budget will ensure that costs do not exceed the $ 45,000.00 figure.

Should you have any questions or require additional information, please do not hesitate in contacting me.

Yours truly,

Murray Harding
