REPORT

REASON FOR THE REPORT:

Council authority is required to enter into a funding agreement.

HISTORY:

1993 On December 17, 1993, City Council authorized the establishment of a River Quality Environmental Studies Reserve Fund for the purpose of providing funding for environmental projects to improve river quality. This reserve was renamed in 1996 to the Environmental Projects Reserve to more accurately reflect its purpose.

2003 In January and April, at the request of the Province of Manitoba, the CEC conducted public hearings on the City of Winnipeg's Wastewater Collection and Treatment Systems.

2003 On August 26, 2003, the CEC issued their report on the hearings recommending that Manitoba Conservation establish “interim” effluent limits for Winnipeg’s three Water Pollution Control Centres in accordance with their Water Quality Standards, Objectives and Guidelines, and further that the City of Winnipeg be directed to plan for removal of nutrients, specifically nitrogen and phosphorous from its treated wastewater discharges.

2003 The Assistant Deputy Minister of Manitoba Conservation wrote a letter dated September 26, 2003, to the Director of the Water and Waste Department, advising of their plans to reflect the CEC report recommendations in Environment Act Licenses for the City's wastewater treatment plants.

On November 26, 2003, City Council approved an increase in the 2004 sewer rate from $2.73 to $3.11 per hundred cubic feet.

2004 On November 24, 2004, City Council approved an increase in the 2005 sewer rate from $3.11 to $3.39 per hundred cubic feet.

2005 Environment Act Licenses were issued for the North End Water Pollution Control Center (NEWPCC), the West End Water Pollution Control Center (WEWPCC) and the South End Water Pollution Control Center (SEWPCC).

On November 23, 2005, City Council approved an increase in the 2006 sewer rate from $3.39 to $3.87per hundred cubic feet.

2006 On February 21, 2006, City Council approved the 2006 Capital Budget which included the Canada Strategic Infrastructure funding.

2007 On February 21, 2007, City Council approved an increase in the 2007 sewer rate from $3.87 to $4.46 per hundred cubic feet, effective April 1, 2007.

DISCUSSION:

On March 19, 2004, the Government of Canada, the Province of Manitoba and the City of Winnipeg announced an agreement in principle to provide strategic infrastructure funding for priority projects which included wastewater improvements. The provincial and federal governments would each provide $25 million towards the wastewater improvement projects that were mandated by the Environment Act Licenses issued for the NEWPCC, WEWPCC and the SEWPCC.

The federal government announced a realignment of strategic infrastructure priorities for the City of Winnipeg in April 2005 and a renewed agreement in principle whereby they would provide $42 million in funding towards the wastewater improvement projects.

This would bring total funding under the proposed agreement to $67 million. The federal commitment was reaffirmed in November 2005.

Total provincial and federal funding of $50 million to be received under the Canada Strategic Infrastructure Plan is included in the Water and Waste Department's sewer rates as approved by City Council. The balance of $17 million is designated for recreation and leisure capital projects. The funding is included in the approved Capital Budget. A summary of the draft agreement terms and conditions is contained in Appendix A.

In 2006, in accordance with the requirements of the Canada Strategic Infrastructure Fund, the department completed an environmental assessment of the project so the federal government could perform an environmental screening of the project under the *Canadian Environmental Assessment Act*.

The negotiations are proceeding and the federal government has completed its Environmental Screening Report so a contribution agreement is now being prepared. This report seeks Council authority to conclude the agreement.

FINANCIAL IMPACT:

The following financial impact statement for this project has been prepared in accordance with the recommendation adopted by Council on December 13, 2000.
