Deliverables

The project would include the following:

A) Hardware and System Software

The system would run on a PC network with a central server. The required hardware and software includes a server, six work stations, system operating software, network hardware and software, and relational database software.

B) GIRO Software

1. HASTUS-Vehicle for creation of master schedules.
2. HASTUS-Minbus for run-cutting and optimization of vehicle schedules.
3. HASTUS-Crew for creation of bus operator work schedules (crew-cutting).
4. HASTUS-Super-Micro for optimization of bus operator work schedules.
5. HASTUS-Geo for automatic calculation of deadhead times and for the graphical display of transit routes and scheduling information.

C) GIRO Services

Project management and systems integration services would include:

1. Installation of HASTUS software.
2. Customization of the HASTUS software, including:
   a) Customization of the cost function settings.
   b) Customization of the HASTUS-Minbus and HASTUS-Super-Micro modules.
   c) The provision of system interfaces that permit the maintenance and the transfer of data from the HASTUS relational database to other departmental systems.

4. The provision of on-site training to Winnipeg Transit staff in the use of the HASTUS system.

5. The provision of support during implementation.

D) GIRO Documentation

Two complete copies of the scheduling system documentation, including User's Manual, Reference Manual, and Administrator's Guide.

It is anticipated that the implementation of the system would take one year.

Costs

The one time cost of the automated scheduling system, including taxes, is as follows:

Appendix "B" referred to in Clause 1 of Report "A" of the Committee on Works and Operations dated September 10, 1996 (continued)
