Applicant: **Waldemar Arndt**
Owner: **Waldemar Arndt**

Recommendation: **Approve with Conditions**

Report Summary:

- The applicant is proposing to develop a four (4) unit residential structure.
- A two story, 40 foot by 57 foot structure will be constructed with three (3) parking stalls in the rear yard and a front driveway.
- The existing single family dwelling will be demolished.

Site Description

The subject property is **54 feet by 100 feet (6,718.33 square feet)** located on the south side of Fortier Avenue, east of Henderson Hwy in the River East neighbourhood of the North Kildonan Ward. The site is zoned "R1-5.5" Residential District. Adjacent properties include residential dwellings to the east and south zoned "R1-5.5". Surrounding lands include commercial properties to the north across Fortier and east across a public lane zoned "C2" Commercial District.

Background

The existing 450 square foot single family dwelling fronting Fortier was constructed in 1940.

Description of the Proposed Development

The owner has applied to rezone and consolidate two lots in order to demolish the single family dwelling and construct a quadplex. The lot is irregular shaped: 54 feet along the front property line and 70 feet along the rear property line.

Analysis

PLAN WINNIPEG
The proposed concept complies with Plan Winnipeg in that a residential rezoning is allowed in Neighbourhood Policy Areas. The proposed development also achieves the Plan Winnipeg policy of intensifying residential density through infill development.

SECONDARY PLAN
In 1976, the North Henderson Highway Secondary Plan was adopted to establish a land-use plan and policies for the improvement of the North Henderson Hwy District. The background information provided in the Secondary Plan file indicates there was conflict in the community in the 1970's between those who wished to preserve the single-family, residential characteristics of Henderson Hwy as opposed to those who wanted to construct high-rise apartment buildings. The Secondary Plan attempts to balance these different interests with land-use plan and policies that essentially restrict the continued development of high rise apartment buildings to specified areas based on density.

Applications to amend the secondary plan (AAP 07/1979; AAP 10/1979; SPA 41/1995) were made for the purpose of increasing the permitted density for specific land parcels. These applications were for large scale developments (30-40 dwelling units) on large land parcels (+20,000 square feet). Today's proposal is for 4 units per acre, on +6,000 square feet of land. The significant difference between the current proposal and the previous amendments is the size of the land parcel (6,718 square feet vs. +20,000), and the scale of development (4 units vs. 30 units).There has been no similar amendments in the last 30 years in terms of scale and land size for the development of a triplex or quadplex.

It is clear the intention of the Secondary Plan is to address larger scale, multi-family unit developments that have occurred along North Henderson Hwy. Triplexes and quads, which are common throughout North Kildonan and Winnipeg, can be conceived as being similar in scale (height, floor area, lot size) with single family and two family homes as opposed to high rise apartment buildings. Therefore, the proposed development can be considered consistent with the Secondary Plan policies to protect the existing single-family neighbourhoods from the intrusion of commercial or multiple family uses.

ZONING

- A **"C2" Commercial District** has 104 Permitted Uses and 47 Conditional Uses (including multiple family dwellings) that are generally orientated to a community wide market. There is no front yard requirement and the maximum building height is 45 feet.
- The **"R1-5.5" Single Family Residential District** requires a minimum lot size of 5,500 square feet and a minimum lot width of 50 feet. A side yard of 5 feet is required and a maximum of building height of 30 feet.
- **"RM-1" Multiple Family District** requires a minimum lot area of 9,000 square feet and a minimum lot width of 75 feet. A side yard of 8 feet is required and a maximum building height of 30 feet. The area per dwelling unit (density) minimum is 2,000 sq.ft per dwelling unit.

LAND USE BY-LAW ISSUES

The proposed development does not meet all the "RM-1" bulk regulations. A variance application has been made (DAV 07-110463/D) for substandard lot width, area, and yards. The variance order, if granted, may be appealed to the Appeals Committee for an additional public hearing, whereas the recommendation by the Community Committee for a rezoning proceeds to Council without an additional public hearing.

TRANSPORTATION AND SITE ACCESS

The current site has an approach from the adjacent public lane. New approaches will be constructed on Fortier Avenue and along the public lane to the east.

SITE PLAN

The applicant is proposing a two story, 40 foot by 57 foot structure. There will be a shared driveway and a two-car garage fronting Fortier. Parking for three additional vehicles will be in the rear yard adjacent to the public lane.

Recommendation

The Planning and Land-Use Division supports the rezoning application. The additional three (3) units will provide a mixture of residential dwellings in the neighbourhood. The scale and density of the proposed structure is consistent with the character of the surrounding area that includes story-and-a-half homes along Fortier and high rise commercial tower along Henderson. The multiple family development at this location is considered appropriate transition from the a high-rise apartment buildings and commercial buildings along Henderson Hwy to the low-rise single

family dwellings along Fortier. The irregular lot shape and location adjacent to a commercial parking lot and public lane makes the lot somewhat relatively less attractive for single family residential development. Thus, the proposal for a multiple family structure compared to other single family residential dwellings in the vicinity is considered to be a reasonable response to the locational characteristics of the site.
