Owner: Same as above

Recommendation: Approve with conditions

Site Description :

The overall Structure Plan area which comprises 918 acres of land is bounded by the Bishop Grandin Boulevard extension to the north, Lagimodiere Boulevard and the Island Lakes residential community to the west, the Perimeter Highway to the south and Plessis Road (the City Boundary) to the east. The first phase of the Sage Creek Development as outlined in a previous application (DASZ 51/05) , is comprised of a gross area of 103 acres and is situated at the N.E. corner of the future Warde Avenue extension and Lagimodiere Blvd and south of Sage Creek Boulevard . It is bounded on the east by the Manitoba Hydro Power Transmission Line. That phase, which includes a large commercial component, is currently well underway. The subject application (Phase II) , is east of the Manitoba Hydro Transmission line and bounded on the north by the extension of Sage Creek Boulevard and on the south by the extension of Warde Avenue. The proposed gross overall area has a total of 79.2 acres.

Background :

In April 2005, the Standing Policy Committee on Property and Development identified the South St. Boniface Area Structure Plan as a priority project within the Planning, Property and Development Department's 2005 Secondary Plan Work Program.

The department implemented a collaborative planning process in partnership with Qualico Developments and their consulting team to prepare the area structure plan. This process also included close consultation with all affected City departments to address any issues related to the development of the subject lands and to ensure that the City's requirements were incorporated

into the plan's policies.

On September 28, 2005, Council gave first reading to By-law 158/05 to adopt the South St. Boniface Area Structure Plan as a Secondary Plan and directed that the Riel Community Committee conduct a public hearing respecting the proposed by-law and plan. It was ultimately passed by Council November 23/05. Shortly thereafter, the details of the first phase of the overall plan were submitted to and assessed by various City Departments including Public Works, Water and Waste and the Planning and Land Use Division. The application outlining details of the first phase of residential and commercial development were approved by Riel Community Committee on January 17th, , 2006 .

Description of the Proposed Development :

Unlike the first phase which had a significant commercial component, the second phase is focused primarily on single family development. While there is to be a healthy mix of multiple family and single family housing in the proposed Phase II area, 27.2 acres of the overall total will be set aside for 'R1-3.5' single family housing versus 7.6 acres of low to medium density multiple family housing. Specifically, there will be 213 single family units and 118 multiple family dwelling units projected for the 2nd Phase. In addition, the proposal calls for 14 'R2' two family dwelling units for an overall total of 345 housing units. A relatively small area adjoining the central impoundment area is to be rezoned for "PR" Public Reserve purposes. As with the first phase of development, provision has been made for public walk-way access to Hydro lands which effectively divide both phases.

Analysis :

The Area Structure plan provided a framework that included a vision of the proposed new community and identified a series of policies that were designed to collectively achieve that objective. Several of the more noteworthy goals outlined were as follows: 1) to create a viable and cohesive community, 2) to develop a vital core commercial centre , 3) accommodate a diversity of housing types, 4) foster a sense of neighbourhood and 5) create an interconnected and efficient road and pedestrian network throughout the proposed community. It is the view of the Planning and Land Use Division that the proposed second phase of the Sage Creek Development outlined in the subject application clearly continues to embody many of the aforementioned goals and policies contained in the Area Structure Plan. The proposed concept is both innovative and creative and , in our view , promotes a community development that is compatible with and a logical extension to the first phase earlier approved in 2006. It should be noted that there are ongoing discussions with the Parks, Riverbanks & Community Initiatives Branch related to several issues (i.e. landscaping of the Hydro corridor and the location of a future community centre) . These issues may or may not be resolved before the July 17th Public Hearing. However that aside, it is recommended that your Committee endorse the proposal as submitted subject to all condition outlined in this report and the report of the Administrative Coordinating Group.

Recommendation :

The Planning and Land Use Division recommends approval of the proposed rezoning and subdivision for the following reasons:

Recommended Conditions of Approval:

1. That the plan of subdivision proposed under File DASZ 21/2007 be approved for preparation as a plan of subdivision by a Manitoba Land Surveyor in accordance with Schedule "A" for File DASZ 21/2007 dated July 10, 2007, for registration in the Winnipeg Land Titles Office subject to the following:
