RECOMMENDATIONS

It is recommended that the 2008 Community Facilities Refurbishment Capital Program notes be revised as follows:

1. DELETE: "Funding for 2008 is to *replace/repair building envelope at 200 Isabel Module 1, and St. Johns Leisure Centre"*

2. ADD: Funding for 2008 is to *replace/repair building envelope at 200 Isabel and 430 Langside and interior refurbishment at 2055 Ness"*

IMPLICATIONS OF THE RECOMMENDATIONS

- The approved 2008 Capital Budget included envelope work at the St. John's Leisure Centre.

- Negotiations are currently underway to change the use of and transfer this building to the Real Estate Division, Planning, Property and Development Department (PPD) portfolio. As such, shortly the St. John's Leisure Centre will no longer be in the building group associated with the capital program but leased to an outside party.

- It is proposed that the 2008 Community Facilities Refurbishment Capital Program funding be revised to:
    - *Not change* the building envelope work at 200 Isabel to refurbish windows, exterior doors, and re-pointing brick work
    - *Delete* work at the St. John's Leisure Centre,

- *Add* building envelope work at 430 Langside to replace the roof that is past the end of its life cycle, and
- *Add* interior refurbishment at 2055 Ness to refurbish auditorium and other interior features

- There are no financial implications in making this change as the overall budget of the 2008 Community Facilities Refurbishment Capital Program will remain $200,000.

HISTORY

PPD is currently negotiating a change of use and lease at the St. John's Leisure Centre. The WRHA, who currently occupies one-half of this property have offered to lease the other one-half of the property, currently occupied by Community Services Department.

The roof at 430 Langside is past the end of its life cycle with extensive leakage causing damage to the interior of the building.

The Ward Councillor has received numerous complaints regarding the condition of the auditorium at the St. James Civic Centre, 2055 Ness. The original cellulose ceiling in the auditorium is damaged, with cellulose material falling to the floor below which is causing patrons concern. Other interior finishes including the flooring are well past their life cycle and need refurbishment.
