Minutes – Executive Policy Committee – November 18, 2009

Minute No. 29
Report – Standing Policy Committee on Protection and Community Services – November 9, 2009

Item No. 3 Community Incentive Grant – Varsity View Community Centre (Charleswood-Tuxedo Ward)
eFile PR-2.6(31)

EXECUTIVE POLICY COMMITTEE RECOMMENDATION:

The Executive Policy Committee concurred in the recommendations of the Standing Policy Committee on Protection and Community Services and the Assiniboia Community Committee and submits the following to Council:

1. That the following eligibility criteria for the Community Incentive Grant Program be waived in this instance, namely:

    A. The project is to be through the development of a sport or recreation capital project.

    B. The project is to clearly articulate a plan of activities including projected work schedules, material, labour, equipment and other project requirements, and lead to the completion of a substantial physical product.

2. That a Community Incentive Grant in the amount of $15,000.00, funded from the Charleswood-Tuxedo Ward allocation, be approved to the Varsity View Community Centre to assist with the cost of the Purchase of a New Zamboni project, subject to the following conditions:

    A. Confirmation of other funding sources;

    B. Approval of final plans and specifications for the project by the Director of Community Services; and

    C. The applicant entering into a formal agreement with the City of Winnipeg.

3. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

Pursuant to the Voting Requirements By-law No. 126/2003, any Community Incentive Grant that does not comply with the terms contained in the Community Incentive Grant Policy requires approval by two-thirds of the Members present at Council.

Minutes – Executive Policy Committee – November 18, 2009

Report – Standing Policy Committee on Protection and Community Services – November 9, 2009

DECISION MAKING HISTORY:

Moved by Councillor Pagtakhan,

That the recommendations of the Standing Policy Committee on Property and Development and the Assiniboia Community Committee be concurred in and forwarded to Council.

Carried

STANDING COMMITTEE RECOMMENDATION:

On November 9, 2009, the Standing Policy Committee on Protection and Community Services concurred in the recommendation of the Assiniboia Community Committee and submitted the matter to the Executive Policy Committee and Council.

COMMUNITY COMMITTEE RECOMMENDATION:

On October 20, 2009, the Assiniboia Community Committee did not concur in the recommendation of the Winnipeg Public Service and recommended to the Standing Policy Committee on Protection and Community Services:

1. That the following eligibility criteria for the Community Incentive Grant Program be waived in this instance, namely:

    A. Organization is a non-profit community organization offering sport or recreation services or is a non-profit community organization that contributes to the health and well being of the community, but not through the development of a sport or recreation capital project that is accessible to the community.

    B. Clearly articulates a plan of activities including projected work schedules material labour equipment and other project requirements. Project does not lead to the completion of a substantial physical product.

2. That a Community Incentive Grant in the amount of $15,000.00, funded from the Charleswood Tuxedo Ward allocation, be approved to the Varsity View Community Centre to assist with the cost of the Purchase of a New Zamboni project, subject to conditions.

ADMINISTRATIVE REPORT

ISSUE: Community Incentive Grant – Varsity View Community Centre

Critical Path: Assiniboia Community Committee

AUTHORIZATION

Author	Department Head	CFO	CAO
M. Kowal	C. Wightman		

RECOMMENDATIONS

The Community Services Department recommends that this application be denied.

IMPLICATIONS OF THE RECOMMENDATIONS

The Community Incentive Grant Program is funded under the Annual Capital Budget.

Project Name: Purchase of New Zamboni
Amount Requested: $15,000
Total Project Cost: $30,000

This application does not meet the following criteria approved by Council:

- Organization is a non-profit community organization offering sport or recreation services or is a non-profit community organization that contributes to the health and well being of the community; **but not** through the development of a sport or recreation project; that is accessible to the community.
- It clearly articulates a plan of activities including projected work schedules, material, labour, equipment and other project requirements. Project **does not** lead to the completion of a substantial physical product.

HISTORY

COMMUNITY INCENTIVE GRANT PROGRAM
APPLICATION EVALUATION

Applicant:	**Varsity View Community Centre**	**Total Project Cost:**	**$30,000.00**
Project Description:	**Purchase of New Zamboni**	**Grant Requested:**	**$15,000.00**
		Maximum Allowed:	**$15,000.00**
Date of Application:	**October 20, 2009**		
		% of Total Project Cost:	**50.0 %**

Funding Source	**Amount**	**Confirmed**
Project Sponsor Funds	$15,000.00	Yes
Total	$15,000.00	

Meets Program Eligibility and Selection Criteria		**Yes**	**No**
1 a)	Organization is a non-profit community organization offering sport or recreation services or is a non-profit community organization that contributes to the health and well being of the community;	X	
b)	through the development of a sport or recreation capital project;		X
c)	that is accessible to the community;	X	
2	Makes a significant contribution to the long-term benefit of the community at large in terms of improved facilities.	X	
3	Does not compete with or duplicate other community facilities.	X	
4	Benefits the community a large and remains accessible to all members of the community.	X	
5	Includes confirmation of sufficient resources to maintain and operate completed projects.	X	
6	Clearly articulates a plan of activities including projected work schedules, material, labour, equipment and other project requirements. Project leads to the completion of a substantial physical product.		X
7	Is feasible within the project management capabilities of the applicant.	X	
8	Total project funding is confirmed.	X	
9	Does not include any funds from the City.	X	

Criteria Exceptions:

- Organization is a non-profit community organization offering sport or recreation services or is a non-profit community organization that contributes to the health and well being of the community; but not through the development of a sport or recreation capital project; that is accessible to the community.
- Clearly articulates a plan of activities including projected work schedules, material, labour, equipment and other project requirements. Project does not lead to the completion of a substantial physical product.

Department Financial Implications:

Departmental Recommendations:

That this application be denied.

Operations and Maintenance Supervisor
Varsity View Community Centre

Dear Sir:

Thank you for taking the time to discuss the Club's requirement for a new ZAMBONI® Ice Resurfacer.

We are pleased to quote as follows:

NEW 2010 ZAMBONI MODEL 445

PROPOSAL

MODEL: **Zamboni 445**

QUANTITY: **One (1)**

CAPACITY: **Intermediate**

- Snow Tank
  94 cubic feet (actual volume)
  108 cubic feet (compacted)
- Ice Making Water Tank
  132 Imperial gallons (standard)
  138 Imperial Gallon Polyethylene
  180 Imperial gallons (Optional and in place of the wash water option)

ENGINE: **General Motors 3.0 Litre**

- Four cylinder overhead valve, liquid cooled; 65 HP at 2,500 RPM NET.
- Hydraulic valve adjusters, 5 main bearings, full-flow oil filter system for long life and ease of maintenance, cast iron block and head for durability.

ENGINE: (Cont'd)

- Engine is approved for propane use by General Motors and comes with hardened valve seats.
- Load sensing governor enables true "hands-free" operation by driver.
- All exhaust piping is stainless steel.
-

TRANSMISSION: **Sundstrand Hydrostatic Pump and Motor**

- Continuously variable pump and motor are axial piston-type and offer volumetric efficiencies as high as 95%.
- Maximum drawbar pull even at low speeds and full hydro dynamic braking.
- Allows the use of a smaller and more efficient engine while still providing superior on-ice power.
- Hydrostat enables the conveyor augers to operate at full speed, regardless of vehicle speed, even when slowing for corners.

DRIVETRAIN: **Dana/Spicer Axles**
Model 44 Front - rated 4,300lb.
Model 44 Rear - rated 4,800lb.

- Rear axle is rigid semi-float design
- Because the 445 users Spicer/Dana axles that are optimized for our chassis, we offer the industry's highest manufacturer approved axle capacities.
- Our chassis/axle combination is the key to the Zamboni 445 having a turning radius of 15 feet. This is a full 3 feet tighter of most other machines.

Hub City Transfer Case

- Rugged cast iron housing for rigid gear and bearing support. Heat-treated alloy steel gears are helical cut for greater strength and lower noise.
- Hydrostatic motor is wet-mounted to housing for long shaft life.

Chassis

- 3" x 5" structural steel Tubing for high strength and long service.

HYDRAULICS:

Vickers Pump and Motor

- Vane-type for high efficiency, flow and speed. This design is also very quiet and has been proven in many rugged applications.
- Direct drive "piggy-back" mount for trouble-free service. No belts and pulleys.

Charlyn Steering Pump

- The use of hydrostatic steering system provides very smooth power steering with little effort.

Filtration and Tank

- Zinga duel filters, 10 micron and 20 micron, ensure a clean environment for all hydraulic components.
- Large 16 gallon tank allows a full 60-70 inches of fluid travel to rid the hydraulic oil of entrapped air and increase heat dissipation.

SNOW TANK AND AUGERS:

- Large snow capacity and a tank design that provides all areas of the tank to be completely filled, even the top and rear corners.
- The 445's snow tank incorporated a smooth bottom and sides, allowing for the snow to slide out with the least amount of residue and at a much lower height.
- Both 10 inch large diameter augers are double-flighted to ensure good performance even during heavy shaving and the augers are powder coated for durability.

CONDITIONER

- Zamboni Ice resurfacers have a well-deserved reputation for producing the finest sheet of ice, even after many ears of being in use.
- A unique design of spring and hydraulic down pressure is used for superior shaving results.
- Performance will continue for the life of the machine by using replacement bushings and springs.

HUMAN ENGINEERING:

- The operation of the 445 is very simple. The operator sets the engine speed with "hands-free" governor and drives the machine with a foot control. However, unlike an automotive transmission, the 445 will provide a full power and speed to the augers at all times, even while slowing for corners. And the 445 will ensure the snow tank is compacted and completely filled

- Speed is controlled by the single foot pedal, equipped with a "dead-man" safety feature to dynamically brake the vehicle to a stop if the operator's foot leaves the pedal.
- Operator compartment has ergonomic layout and includes a modern steering wheel with spinner knob.
- Engine and hydraulic compartment is easily accessed through he front door for daily maintenance checks, even with the snow tank down.
- Wiring and looms are well routed and protected. Wires are individually labeled for easier service and trouble-shooting.

FACILITY ENGINEERING:

- Zamboni Ice Resurfacers offer unparalleled shaving and snow conveyor performance. A quality sheet of ice is among an arena's primary selling features.
- The 445 has the tightest turning radius in the industry, enabling operators to resurface deeper into their corners.
- The snow tank on the 445 is designed in a compact, rectangular package with a flat bottom and sides. This gives the 445 the lowest front-dumping height available. This is important for both dumping indoors as well as outdoors in adverse conditions.
- Our unique engine and hydrostatic transmission enables the 445 to use a smaller, more efficient engine and can provide significant fuel savings.
- The Ontario Ministry of Labour has recommended in a "Hazard Alert Bulletin" that arena ventilation be determined by horsepower of the ice resurfacer, which is over half of larger engines used in the competitor's machine. This can translate to considerable energy and facility savings.

WARRANTY: 24 (TWENTY-FOUR) Months or 2,000 hours, parts replacement only.

SAFETY STANDARDS:

The 445 is engineered to meet or exceed O.S.H.A. and A.N.S.I. safety labeling requirements.

PRICE: **ZAMBONI 445.....**

Propane Carburetion.....	Standard
Hydrostatic transmission....	Standard
Catalytic Converter.....	Standard
Lambda Fuel Mgmt. System...	Standard
Plastic Conditioner Runner	Standard
Blade angle gauge.....	Included
Two (2) New Shaving Knives.....	Included
Board Brush.....	Included
Poly Water Tank.....	Included
Gauge Package.....	Included
Wash Water System.....	Included

PRICE FOB Winnipeg .... $ 92,980.00
