HISTORY

On March 24, 2004, Council adopted Item 1 of the Report of the Executive Policy Committee, dated March 10, 2004, delegating to the Chief Administrative Officer certain authorities of the Materials Management Policy. Aside from this policy, the Chief Administrative Officer is required to report quarterly on the assignment of consultants.

CONSULTANT ASSIGNMENTS – JANUARY 1 TO DECEMBER 31, 2009

Attached is information obtained from each department relating to consulting assignments for all quarters of 2009.

Consultant services are services provided directly to the City of Winnipeg (City), as defined in FM-002:

- Medical doctors, dentists, nurses, pharmacists, veterinarians, engineers, land surveyors, architects, accountants, lawyers and notaries (AIT* Professionals) (*Agreement on Internal Trade).

- Information technology consultants, communications consultants, management consultants, training consultants, accredited real estate appraisers, agrologists, dietitians, home economists, interior designers, occupational therapists, optometrists, physiotherapists, psychiatric nurses, psychologists, trainers, speech and hearing therapists and landscape architects (non-AIT Professionals).

The above definition excludes service contracts (e.g. elevator service, public surveys).

A summary of consultant assignments retained by the City for the period of January 1 to December 31, 2009 is provided in the attached table.

The 2009 total exceeds the $ 34.8 million total for 2008. This increase is due primarily to services provided in respect of significant capital projects in the Water and Waste and Public Works Departments, including the Water Treatment Plant, required upgrades to the sewer and wastewater systems and various roads and bridges projects.

Detailed department consultant assignments are attached. Where the **Total Payment to Date for Entire Consultant Contract** exceeds $100,000, an explanation has been provided for over-expenditures greater than or equal to 10% or $1,000,000, whichever is less.

			* On April 22, 2003 the City made a direct assignment to Dillon Consulting Limited (Dillon) for planning, design, and engineering services for Winnipeg's Bus Rapid Transit (BRT) System. The procurement of a consultant for this project preceded the current procedures shown in Administrative Directive FM-002 which directs that projects of this magnitude shall be publicly bid. In October 2004, following postponement of the BRT initiative by City Council, Winnipeg Transit advised Dillon to complete only those tasks of the assignment that were near completion. On March 18, 2008 the City authorized Dillon to resume work associated with specific tasks of the initial assignment. ** Subsequently, it was recommended that Dillon be awarded the contract to provide contract administration services, project management and other duties associated with constructing the Southwest Rapid Transit Corridor Stage 1. Introducing a new consultant into the process at this time, who was unfamiliar with the design and details of the integrated work required on a multi-disciplined, complex project, within the available timeframe, would be difficult and impose significant risk to the project in terms of cost and meeting the aggressive project schedule.

The construction period was extended to reduce construction costs from the proposed three months to thirteen months. This increased engineering costs for inspection services and disbursements. May 6/08 Over expenditure Report approved by CFO.
AECOM Canada Ltd (formerly Earth Tech Canada Inc)	Engineer	Deacon UV Disinfection Project	SS	968,254.00	1,933,967.69	9,931.34	790.56	501.76	378.51	11,602.17	1,945,569.86	During start-up of the facility in early 2005, an unusual operating event resulted in breakage of a UV lamp. Extensive investigation, computer modelling and system redesign were required to mitigate this problem. Subsequently, lengthy and detailed system testing was undertaken to ensure proper operation, followed by retraining of operating staff on the revised system. Finally, a HAZOP of the system was conducted to confirm that appropriate redundancy and control systems were in place and build operator confidence before start-up in May of 2006. Since May, 2006 there have been recurring, serious equipment failures while under warranty which have required further time by the consultant to resolve. This over expenditure was approved by CFO October 2, 2007.
