Project Plan for the Royal Canadian Legion Branch #100

The objective of this project is to replace a built up roof system, two rooftop HVAC units, the suspended ceiling in the main floor of the clubrooms as well as the lighting fixtures.

The roof has reached the end of its lifespan and requires periodic patching to repair leaks. As part of the replacement, the insulation in the roof will be increased from R16 to R25. The two HVAC units must be removed from the roof using a crane to facilitate the roof replacement. The units have reached the end of their lifecycle and will be replaced with new units. The ceiling is severely stained from the days when smoking was allowed indoors as well as from leaks in the roof. The lighting in the clubroom is old and breaking down and will be replaced with new energy efficient lighting.

This upgrade to the facilities will enable us to continue to support the veterans, seniors and general members from the Charleswood area with social activities. There are daily activities in the clubrooms consisting of but not limited to seniors bingo, cribbage, pool top curling, ladies pool league, men's snooker league and a mixed darts league. On the last Monday of each month we bring in residents from the local Personal Care Homes for an afternoon of bingo. The Legion has a membership in excess of 850. There is a seniors club operating within the Legion consisting of 148 members. Completion of this project will provide a warm, bright and dry facility for the next forty years or more.

The roof and HVAC replacement will commence in November 2012 followed by the replacement of the ceiling and lighting in January 2013.

This project is limited to direct replacement of existing facilities therefore it was not considered necessary for community consultation.

Paula Havixbeck and her assistant Chandra Rempel are the only city staff that has been involved in the project to date.
