HUMANE ALLIANCE

"We're in a very poor area, and when we started to create our clinic, people thought we were crazy. The NSNRT's step-by-step mentoring and blueprint made it possible."

-Linda Clemons, Executive Director
Humane Society of Putnam Co. Spay/Neuter Clinic

Open a Clinic Overview (NSNRT)

The National Spay/Neuter Response Team (NSNRT) is a strategic training program that addresses the urgent need for a skilled and well-organized mentor to help guide other humane organizations in the self-sustaining operation of high-volume, high-quality spay/neuter clinics.

We are committed to sharing information and best practices with others, and with support from PetSmart Charities and the ASPCA, the NSNRT has evolved dramatically since it began in 2006. We are very proud to have played a small part in what our 115+ mentored clinics have accomplished, creating a network of spay/neuter professionals who foster supportive, collaborative ties that span the nation.
