APPENDIX 'A'

FILE:	DAZ 228/2013
RELATED FILES:	DAV 13-167024/D
COMMUNITY:	City Centre Community
NEIGHBOURHOOD #:	1.106
SUBJECT:	To rezone the subject land from an "R1-S" Residential Single-Family District to an "RMF-L" Residential Multi-Family District
LOCATION:	629 Dudley Avenue
LEGAL DESCRIPTION:	Lot 48 Plan 27576

APPLICANT:	5468796 Architecture Inc. (Shannon Wiebe)
OWNER:	Gregory Chernish (Health Point Clinic)
RECOMMENDATION:	Approval

SITE DESCRIPTION

The subject property, which is currently zoned "R1-S" Residential Single-Family District, is located at the northeast corner of Hugo Street and Dudley Avenue, in the Earl Grey neighbourhood of the Fort Rouge – East Fort Garry ward.

North: Residences zoned "R1-S" Residential Single-Family District
South: Commercial use zoned "C2" Commercial District
East: Commercial uses zoned "C2" Commercial District
West: Residences zoned "R1-S" Residential Single-Family District

DESCRIPTION OF THE PROPOSED DEVELOPMENT
The applicant seeks approval to rezone the subject property and to construct a three storey, six unit multiple-family building.

There will be two units on the ground floor and four units spanning the second and third floors. The building will have its main entrances oriented to Hugo Street.

Reason for application
The "R1-S" Residential Single-Family District limits the density to single-family dwellings only. "RMF-L" Residential Mutli-Family District, however, allows multi-family development. Consequently, to accommodate the proposed density, a rezoning to "RMF-L" is required.

ANALYSIS AND ISSUES
OurWinnipeg/Complete Communities
A. Policies
This portion of the Earl Grey neighbourhood is designated as an Area of Stability. Policies which are relevant to this application are as follows:

1) Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complimentary to the existing scale, character, and built form

2) Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments

3) Encourage intensification to occur at centres and along corridors

4) In order to meet the full life cycle of housing needs within the community, promote a mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, and townhouses.

5) Provide clarity and promote compatibility between existing developments and new developments through design and development standards, such as creation of *Infill Development Guidelines for Multiple-Family Developments in Low Density Neighbourhoods.*

Other
The Conference Board of Canada has projected a substantial shift in the share of new units, away from single-family, and towards apartment/condo multiple-family units, over the next 20+ years. As per the Conference Board forecast from 2009 to 2031

- Single-family is projected to decrease from a 71% share to a 35% share of housing starts
- Multiple-family is projected to rise from a 29% share to a 65% share of housing starts.

A key assumption in the Conference Board projections is that, as the 'boomer' generation ages, they will generally leave their single-family homes and move into condos or apartments.

By providing a variety of different housing types in each neighbourhood, people have an opportunity to "age in place" – staying in familiar surroundings and keeping the same networks of friends.

iii. Draft Infill Development Guidelines
Below are the applicable guidelines for this project from the *Draft Infill Guidelines* and a discussion of how they have been addressed by the applicant.

It should be stated at the outset that the subject property is on a short block, with only three properties. The adjacent properties, to the east, are commercial, and to the west is Hugo Street. Given the context, the subject property is transitional in nature and this is an important consideration when applying the infill guidelines.

Guideline #1

2.2.2 iii) Establish rear yard setbacks that are consistent with the pattern of the neighbourhood

The Zoning By-law requires a 25 foot rear yard setback. The principal reason for the rear yard setback is to allow for privacy and sunlight penetration at the rear of properties.

The proposed development provides a rear yard setback of 22 feet. However, this is consistent with the adjacent commercial building to the east.

Guideline #2

2.2.2 iv) Front yard setbacks should respect the established street pattern by providing setbacks typical of the neighbourhood

The proposed front yard setback is 12 feet. This is consistent with the front yard setback of other homes on Dudley Street, to the west.

Guideline #3

2.2.3 i) The main building façade should be oriented to face the public street and encourage opportunities for informal surveillance and human activity on the street

The proposed development orients its main entrances to Hugo Street.

Guideline #4

5.2 i) Massing and height of new buildings should take into consideration the area context

Height
The subject property is approximately 31 feet, 10 inches to the top of the parapet. This is consistent with the maximum height that is permitted with the current "R1-S" Residential Single-Family District zoning.

Massing
The massing of the proposed building fits its context as a transitional site.

RECOMMENDATIONS
The Urban Planning Division recommends approval for the following reasons:

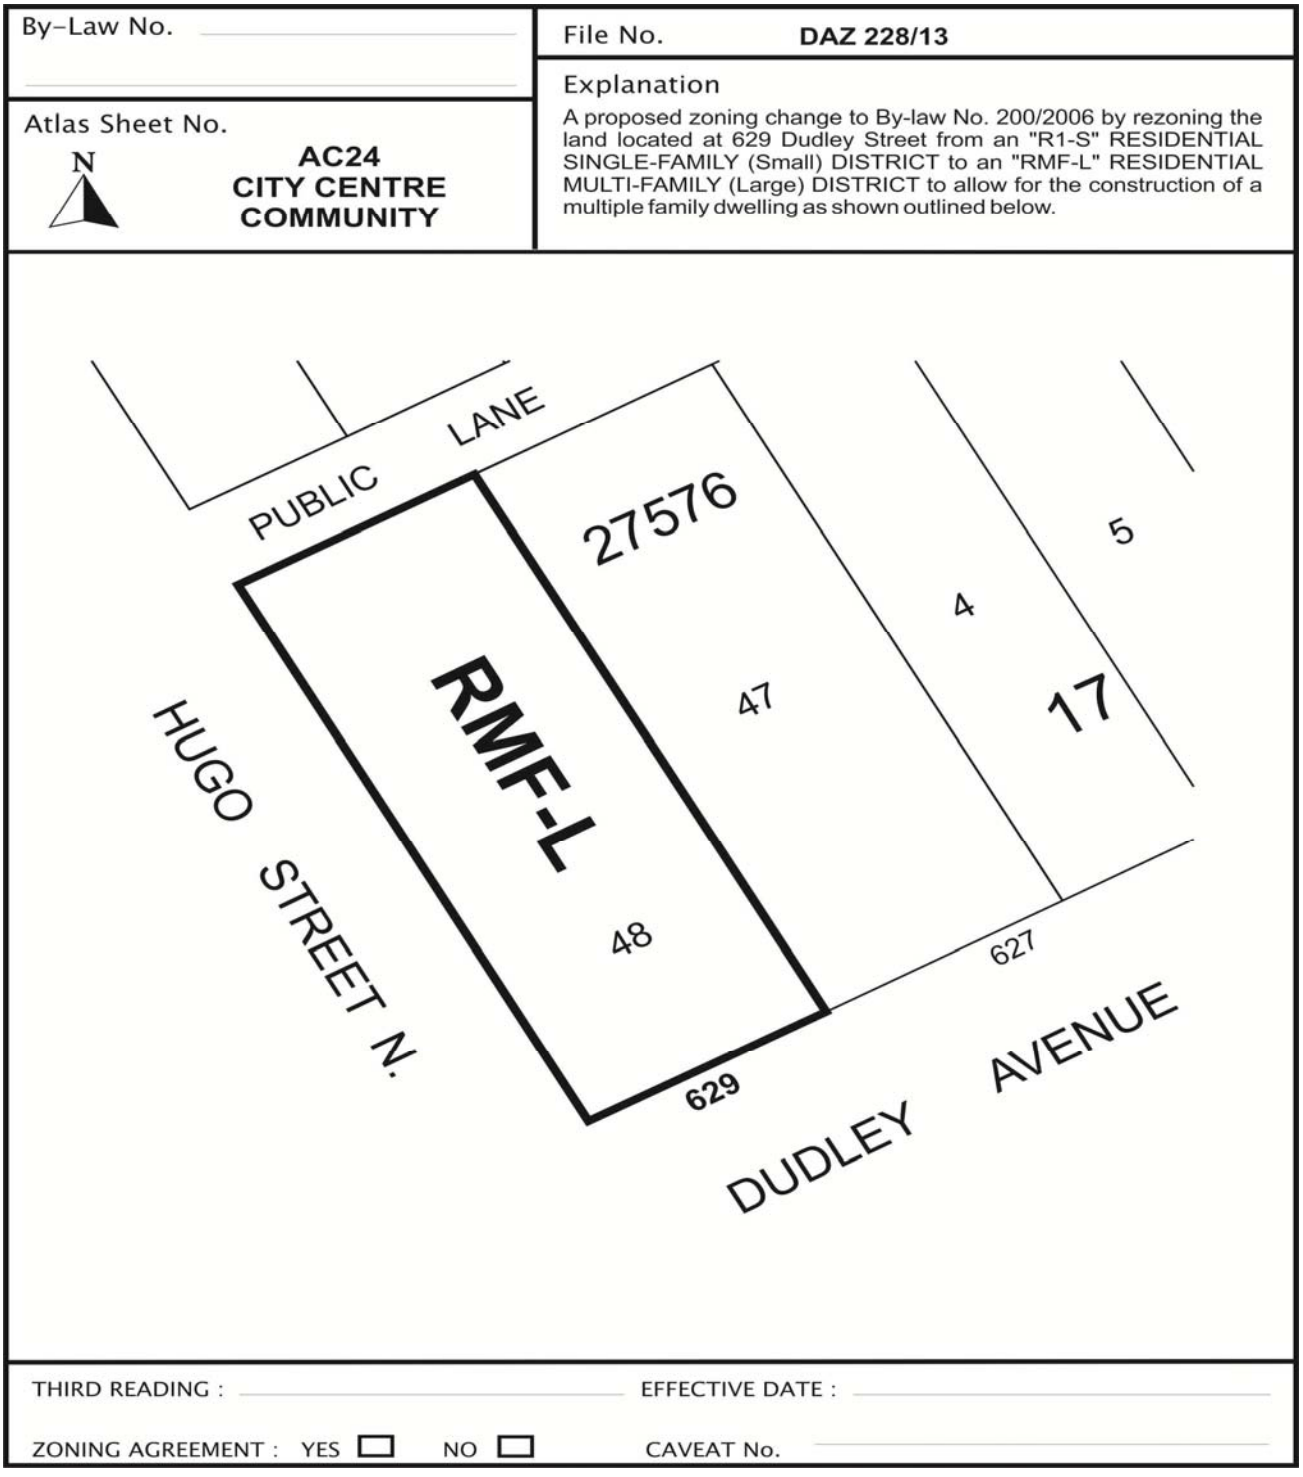

- The proposal is consistent with *Complete Communities and the draft Infill Guidelines for Multiple-Family Development in Areas of Stability*

- The subject site is an appropriate location for a development with a higher density than the community norm
