1. That this report on Digital Sign Statistics be received as information.

REASON FOR THE REPORT

This report presents a summary of digital sign statistics. On December 12, 2013, Council directed the Winnipeg Public Service to *report back to the Standing Policy Committee on Property and Development in 18 months with digital accessory sign statistics, to provide Council with an assessment of the proposed regulations regarding the number of signs allowed per lot, signs within Traffic Decision Locations identified by Public Works, and signs in "R" and "PR" Districts.*

HISTORY

On December 12, 2013, Council directed the Winnipeg Public Service to report back to the Standing Policy Committee on Property and Development in 18 months with digital accessory sign statistics, to provide Council with an assessment of the proposed regulations regarding the number of signs allowed per lot, signs within Traffic Decision Locations identified by Public Works, and signs in "R" and "PR" Districts.

The digital signs statistics requested by Council were identified as ones that could be somewhat sensitive for business owners, residents, and the Public Service. Council proposed that the Public Service report back on signs in these locations as a way to assess the new regulations.

The following is a summary of the sign statistics that have been collected over the past 18 months of these regulations being in effect.

Number of signs allowed per lot

Summary:

- The regulations adopted December 2012 set a limit of one digital accessory sign per lot except in C3 districts, where the maximum is two; and C4 districts, where the maximum is the greater of one per frontage or two.
- Since December 2012, there have been (0) applications for more than one digital accessory sign per lot.

Signs within Traffic Decision Locations

Summary:

- The regulations adopted December 2012 restrict digital billboards or digital accessory signs from being located within Traffic Decision Locations (zones adjacent to Traffic Signals, Pedestrian Corridors, Railway Crossings), as an issue of public safety.
- Since December 2012, four applications for digital signs in Traffic Decision Locations were received.
- Three out of four were rejected at the Board of Adjustment Hearing in accordance with recommendations of the Public Service.
- Two of the four that were rejected were appealed, one application was subsequently withdrawn, and another is pending.
- The Public Works Department lodged a complaint about a Digital Billboard erected before December 2012, which is located within a Traffic Decision Location and which began showing moving copy and third party advertising. Zoning and Permits has initiated enforcement action for this instance.

DIGITAL SIGNS IN TRAFFIC DECISION LOCATIONS SINCE DECEMBER 12, 2012

Digital Signs in "R" and "PR" Districts

Summary:

- Previous to the regulations adopted December 2012, Digital Readerboards were the only type of digital signs allowed in “R” (Residential) and “PR” (Park) districts.
- The regulations adopted December 2012 allow digital accessory signs to also be located within “R” and “PR” districts for schools, community centres, and religious institutions, provided the sign is turned off from 10:00 PM to 7:00 AM.
- Since December 2012, five applications were received for digital signs in “R” and “PR” districts.
- No complaints have been logged.
