ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY

Under the *Complete Communities Direction Strategy* the proposed development is within the Areas of Stability – Recent Communities policy area. Key policies guiding development within Areas of Stability include:

- Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complimentary to the existing scale, character and built form.
- Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing development.

ZONING AGREEMENT

The subject property contains a zoning agreement that was created when the property was rezoned to "R2" in 1972. The zoning agreement contains a number of clauses including the requirement that shall only be used as a landscape buffer strip.

DISCUSSION

The application is being supported on the basis of unique site characteristics. Specifically that:

1. landscape buffer strip is no longer required; and
2. the proposed development is similar in scale and character to surrounding land uses.

RECOMMENDATION

The Urban Planning Division recommends the application be approved because:

1. landscape buffer strip is no longer required; and
2. the proposed development is similar in scale and character to surrounding land uses.
