STANDING POLICY COMMITTEE ON FINANCE

QUESTION PERIOD

Minute No. 107
Councillor Wyatt stated that in the last couple of years Council has attempted, prior to the Capital Budget, to bring forward reports on projects, specifically road projects, so that tenders could be issued early in the year to get those projects out as soon as possible. He added that the City was now confronted with the challenge of a Provincial Government that was spending more on capital than ever before and that this would drive up the costs of projects, especially if the tenders were late getting out, and questioned if the department had indicated anything in terms of a report coming forward to get the projects moving since they were in the five year forecast.

Councillor Morantz agreed to take the matter under advisement and respond back to the Councillor at a later date.
