RECOMMENDATIONS

1. That Zoning Agreement Caveat 250050/1 under File DASZ 45/1975 dated October 4, 1978 (By-Law No. 1671/1977) be withdrawn.

2. That the Director of Legal Services and City Solicitor be requested to withdraw the subject Zoning Agreement to DASZ 45/1975 (By-Law No. 1671/1977) as approved in aforesaid Recommendation 1.

3. That the Proper Officers of the City are hereby authorized to execute said Amending Agreement.

4. That the Director of Legal Services and City Solicitor be requested to do all things necessary for implementation in accordance with the terms of The City of Winnipeg Charter.

REASON FOR THE REPORT

- The applicant is proposing to develop a three unit, multi-family building on the eastern portion of the site. In order to do so, the applicant must withdraw zoning agreement caveat no. 250050/1 for DASZ 45/1975 that restricts the land as follows:
    - On the following lots within the "RM-1" land, namely, Lot 1 in Block 1; Lots 1 & 2, in Block 2; Lot 1 in Block 3; Lots 1 & 2, in Block 5; and, Lots 1 & 2, in Block 7, no

buildings shall be constructed except semi-detached dwelling units, more commonly referred to as duplex dwelling units.

- A zoning agreement amendment requires a Public Hearing as per the *Development Procedures By-law* and *The City of Winnipeg Charter.*
- The Report is being submitted for the Committee's consideration of the development application at the Public Hearing.

IMPLICATIONS OF THE RECOMMENDATIONS

- If the recommendations of the Urban Planning Division are concurred in, the zoning agreement affecting the subject site will be withdrawn.

HISTORY

DASZ 45/1975 (By-law 1671/1977)

- The subject site was rezoned to an "RM-1" (now RMF-S under the current Zoning By-law) district under DASZ 45/1975. DASZ 45/1975 was a larger scale subdivision and rezoning application in the Waverley Heights neighbourhood along Chancellor Drive and Gull Lake Road. The original zoning agreement registered on April 20, 1977, restricted the site as follows:
    - No buildings shall be constructed on the "RM-1" land except townhouses having individual at-grade access not exceeding two and one-half storeys in height with not more than six dwelling units attached to each other.
- The original zoning agreement affecting the land (and other lots within the subdivision) was later amended to the following on December 7, 1977:
    - On the following lots within the "RM-1" land, namely, Lot 1 in Block 1; Lots 1 & 2, in Block 2; Lots 1 & 2, in Block 5 and Lot 2, in Block 7, no buildings shall be constructed except semi-detached dwelling units, more commonly referred to as duplex dwelling units.
- The amended zoning agreement mentioned above was once again amended on October 4, 1978. This time the clause affecting the subject site was amended to include a few more lots than the previous clause had:
    - On the following lots within the "RM-1" land, namely, Lot 1 in Block 1; Lots 1 & 2, in Block 2; Lot 1 in Block 3; Lots 1 & 2, in Block 5; and, Lots 1 & 2, in Block 7, no buildings shall be constructed except semi-detached dwelling units, more commonly referred to as duplex dwelling units.

RECOMMENDATION: Approval

SITE DESCRIPTION

- The subject property is located on the north side of Chancellor Drive, immediately west of the CNR Letellier Subdivision in the Waverley Heights neighbourhood of the St. Norbert Ward.
- The site is 5,910 square feet in area and has one dwelling unit on it that is part of a duplex.
- The property is located within the Areas of Stability – Recent Communities policy area under the Complete Communities Direction Strategy and is zoned "RMF-S" Residential Multi-Family Medium.

SURROUNDING ZONING & USES (See Figure 2)

North: Duplexes zoned R2.

South: Duplexes zoned RMF-S.

East: A back lane and the CNR Letellier Subdivision.

West: Duplexes zoned RMF-S.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

- The applicant is proposing to develop a three unit, multi-family building on the eastern portion of the site.
- The existing building on the land would remain in place and the three-unit building would be developed eight feet to the east of the existing building.
- The proposed building will be three storeys tall. Parking requirements of the Zoning By-law will be met for the three unit development.
- An associated variance is required for a reduced front yard and rear yard setback (see DAV 13-176416/D).

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY

- Under the *Complete Communities Direction Strategy* the proposed development is within the Areas of Stability – Recent Communities policy area. Key policies guiding the development of Areas of Stability include:

- Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complimentary to the existing scale, character and built form.
- Promote the form of buildings and spaces that are sensitive to the community context and that address the transition between new and existing development.
- Encourage intensification to occur at centres and along corridors.
- Support Complete Communities by ensuring diverse and high quality housing stock.
- In order to meet the full life-cycle of housing needs within the community, promote a mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.

- The site is also located along the Southwest Rapid Transit Corridor, where the following directions are provided in the Complete Communities Direction Strategy:
  - Promote transit oriented development to accommodate growth and change at centres along rapid transit corridors through integrated land use, transportation and infrastructure planning.
  - Promote transit supportive land use and urban form along rapid transit corridors.
  - Promote transit oriented development and centres along rapid transit corridors through incentives and innovative approaches where required.

ZONING (BY-LAW 200/2006)

"RMF-S" Residential Multi-Family Small

- The RMF-S zone is intended to accommodate the development of multi-family units in neighbourhoods with medium to high residential densities. The dimensional standards for multi-family structures in the RMF-S zone are: a minimum front yard of 20 feet; a minimum rear yard of 25 feet; a minimum side yard of 4 feet and, a maximum building height of 35 feet. The minimum lot area is 9,000 square feet and the minimum lot area per dwelling unit is 1,250 square feet.

LAND USE BY-LAW

Amendment to Zoning Agreement DASZ 45/1975

- The applicant has applied to withdraw zoning agreement caveat no. 250050/1 for DASZ 45/1975 that restricts the land as follows:
  - On the following lots within the "RM-1" land, namely, Lot 1 in Block 1; Lots 1 & 2, in Block 2; Lot 1 in Block 3; Lots 1 & 2, in Block 5; and, Lots 1 & 2, in Block 7, no buildings shall be constructed except semi-detached dwelling units, more commonly referred to as duplex dwelling units.
- The applicant would like to delete this clause as he would like to develop a three unit multi-family dwelling to the east of the existing dwelling on the site for a total of four dwelling units on the land.

COMPATIBILITY WITH THE SURROUNDING NEIGHBOURHOOD

- The surrounding properties in the neighbourhood have been developed in a manner consistent with the zoning agreement registered on the property in that the multi-family sites are developed as duplexes.
- However, the zoning agreement put in place is over 35 years old. Since that time, the City of Winnipeg has adopted several Development Plans and Secondary Plans to create policies that are reflective of current public desires for development and current practices. The latest adopted plan is OurWinnipeg and the Complete Communities Direction Strategy.
- Under OurWinnipeg and the Complete Communities Direction Strategy the subject site is considered to be located within an Area of Stability and along a Rapid Transit Corridor. Both policy areas encourage modest intensification that is compatible with the neighbourhood.
- In terms of form, the proposed three-unit development is generally compatible with the surrounding properties. The proposed density can also be seen as modest intensification as the density does not exceed the requirements of the current zoning for the site. The subject property is particularly suitable for modest intensification in that it is located immediately adjacent to the Southwest Rapid Transit Corridor.
- It should be mentioned that the Public Service commonly recommends a minimum setback of 49.2 feet from the CNR Letellier Subdivision rail line right-of-way. In this instance, the subject property is further than 49.2 feet from the western property line of the CNR Letellier Subdivision and therefore such a condition is not necessary.

RECOMMENDATION

The Urban Planning Division recommends **approval** for the following reason:

- The Complete Communities Direction Strategy encourages the intensification of land in Areas of Stability along rapid transit corridors. The proposed zoning agreement amendment facilitates modest intensification that is compatible with the surrounding area.
