Report - Standing Policy Committee on Property and Development – February 17, 2015

Item No. 2 Expropriation of Lands – Capital Integration Project (Southwest Transitway (Stage 2) and Pembina Highway Underpass)

EXECUTIVE POLICY COMMITTEE RECOMMENDATION:

The Executive Policy Committee concurred in the recommendation of the Standing Policy Committee on Property and Development and submitted the following to Council:

1. That the Director of Legal Services and City Solicitor be instructed to initiate expropriation proceedings, including preparing the necessary by-law for submission to Council, to acquire the land interests herein identified and required by the City for the Southwest Transitway (Stage 2) and Pembina Highway Underpass Project.

2. Subject to Council's confirmation of the proposed expropriation, that all lands acquired for the purpose of the Capital Integration Project (Southwest Transitway (Stage 2) and Pembina Highway Underpass) be approved to be open as a public works or public right of way as required for the project.

3. That the proper officers of the City be authorized to do all things necessary to implement the foregoing, including demolition of any buildings, execution of any necessary documents and preparation of any necessary by-laws.

RECOMMENDATIONS

1. That the Director of Legal Services / City Solicitor be instructed to initiate expropriation proceedings, including preparing the necessary by-law for submission to Council, to acquire the land interests herein identified and required by the City for the Southwest Transitway (Stage 2) and Pembina Highway Underpass Project.

2. Subject to Council's confirmation of the proposed expropriation, that all lands acquired for the purpose of the Capital Integration Project (Southwest Transitway (Stage 2) and Pembina Highway Underpass) be approved to be open as a public works or public right of way as required for the project.

3. That the proper officers of the City be authorized to do all things necessary to implement the foregoing, including demolition of any buildings, execution of any necessary documents and preparation of any necessary by-laws.

REASON FOR THE REPORT

- Council approval is required for the City to expropriate land. The subject properties, identified in the attached Schedule "A", are needed for the works required for the Capital Integration Project (Southwest Transitway (Stage 2) and Pembina Highway Underpass). Authorization to expropriate is required immediately to ensure that the City is in legal possession of all land interests for construction to commence in early 2016.

IMPLICATIONS OF THE RECOMMENDATIONS

There are no regulatory or human resource implications associated with this report. No environmental issues are anticipated related to the proposed recommendations of this report, but proposed offers of settlement will include terms and conditions to protect the City's interests in this regard. While there are no direct financial implications associated with the initiation of expropriation proceedings, doing so will ensure that the City will acquire the property and incur settlement and ancillary costs. Such costs are not reasonably estimable at this time.

HISTORY

On October 22, 2008, Council adopted the plan for the Southwest Rapid Transit Corridor (Stage 1), which was completed and operational in April 2012.

On November 16, 2011, Council adopted the Transportation Master Plan, which included the provision for the expansion of the Pembina Highway Underpass (PHU) and five new transit corridors, with the first being Stage 2 of the Southwest Transitway (BRT II).

Following the aforementioned Council approval, Winnipeg Transit and the Public Works Department worked with its consultant to identify potential transitway alignments for BRT II and proposed design options for PHU.

On March 20, 2012, Council approved an amendment to the Transportation Master Plan, which identified the preferred alignment for the BRT II to be from the PHU through the Parker Lands to the north/south Manitoba Hydro corridor switching to the CN Letellier Subdivision track south of Gregoire Avenue to Markham Road and across Pembina Highway into the University of Manitoba property, as shown on Figure 1 attached. Upon Council's approval of the preferred alignment, detailed design work on the BRT II commenced.

In December of 2012, the preliminary design for the Pembina Highway Underpass was completed.

Considering the proximity, timing and correlation of the two projects, it was determined that construction of both the BRT II and PHU as part of the same project would allow costs to be minimized, along with construction timelines and disruptions to traffic.

Upon completion of the preliminary design of the BRT II, the City held four public consultation open houses (November 18 and 19, 2013 and February 24 and 25, 2014).

On June 25, 2014, Council considered and approved Winnipeg Transit's report Capital Integration Project – Southwest Transitway (Stage 2) and Pembina Highway Underpass. The Director of Planning, Property and Development was also authorized to negotiate the acquisition of land required for this project.

The City will be required to expropriate 31 partial takings and 4 full takings from private land owners, as shown on the attached Schedule "A".

The City's Real Estate Division has initiated contact, in writing, with all 35 private property owners that lands are required for the BRT II & PHU project; however, due to the large number of land owners that acquisitions have to be negotiated with and the very aggressive timelines of this project, it is highly unlikely that all private land interests will be acquired in time to allow for preconstruction to commence in the first couple of months of 2016.

Winnipeg Transit, the Public Works Department and Planning, Property and Department Development all concur that it would be in the City's best interest to immediately initiate expropriation proceedings to ensure all land interests are acquired in sufficient time to allow for preconstruction work to commence in the first couple of months of 2016.

In the meantime, the Real Estate Division will continue its efforts to negotiate the acquisition of the required land interests for the private property owners.

FINANCIAL IMPACT
