CentreVenture
Urban Development Bank

Utilization of the Urban Development Bank

1. The initial City of Winnipeg investment of $10 million is targeted to be used to invest in:
    - Properties that are held for future development
    - Temporary investments in development projects like Centre Village and the Bell Hotel
    - Interest bearing loans and mortgages
        - The interest earnings are used as revenue for CentreVenture's general operating. This interest is a significant portion of CentreVenture's revenues. In 2012 interest revenue was $494K representing more than 50% of total operating revenues.
2. Community investments of $500K to $1 million are made annually. These investments are made in the form of grants, expenses incurred to complete development transactions and full or partial contributions of properties to development transactions.
