Hello!

As a concerned resident living closely to Gateway and Raleigh, our family is totally against a corridor to allow East St. Paul residents to travel through North Kildonan in a vehicle. The 101 Perimeter was designed on the premise that traffic from OUTSIDE the city would use the 101 to arrive at their destinations efficiently. The 101 was built to accommodate the communities such as East St. Paul. We, the taxpayers, are very tired of paying for OUTSIDERS who continue to use our roads, etc. and pay nothing! Finish the Perimeter properly, with a cloverleaf that travels well….take away some of the lights so traffic flows smoothly and we can avoid the accidents that occur weekly, be it winter, spring, summer or fall. How many people are going to die at that North East Perimeter intersection before the City and Province work together to complete the project. The citizens of North Kildonan would love a walking/biking path that extends into East St. Paul. However, traffic…NOT!

We are proud to have Cathy Cox, Jeff Browaty, and Bonnie Mitchelson who care and support our community with great passion.

Thank you…The Douglas Family…Randy, Sandy, Lukas Thomas Nathan Carson
