Subject: RE: The Proposed development of the Active Transport Route Between Winnipeg/East St. Paul Via PT101 Underpass

On Apr 20, 2015, at 4:34 PM, wrote:

We, the undersigned, **do not** support the proposed Gateway Raleigh through pass for the following reasons:

1. The wording, **at this time,** used by the City establishes a loophole for exactly the connection that the North Kildonan residents oppose. This wording should changed so that it is clearly understood that this will never happen.

2. After multiple meetings, presentations, and hearings it should be abundantly clear as to how opposed the people in North Kildonan are to this ludicrous proposal.

3. The possibility-probability of the Smart Centre proposal pushing-developing the Big Box Center becomes magnifies if the through pass becomes a reality. This is the loophole that Smart Center is waiting for.

4. The devaluation of property in the area (not only monetary but environmental along with community pride).

5. Many, many, more wasted tax dollars by the NDP government that the present, and future generations will have to bear. Could this huge amount of money not be used to benefit many people rather than just a select few.

6. Safety issues due to the massive increase in traffic.

7. The dishonesty of the parties involved pushing this project.

In conclusion, we are totally opposed.
