STANDING POLICY COMMITTEE ON PROPERTY AND DEVELOPMENT

QUESTION PERIOD

Minute No. 287
Councillor Wyatt noted that there used to be a program that targeted older neighbourhoods that needed extra help in terms of cost of land assembly and costs associated with servicing that made a positive difference to renew older neighbourhoods and questioned the status of the latest multiple family housing grant program; to which Councillor Orlikow agreed to find out and report back.

Councillor Eadie questioned if the Chair knew if they were looking at a secondary plan for South Point Douglas, which is between the river and Waterfront Drive, or if there was consideration in terms of secondary plans related to the north side of the CP Rail mainline around the Louise Bridge.

Councillor Orlikow indicated that he would get back on the specifics about the South Point Douglas Secondary Plan but noted that the Administration would submit recommendation on what plans they determine have the most value at one time as there would not be sufficient funds to do all of the secondary plan requests in the queue.

Councillor Eadie asked what was the actual scope of the South Point Douglas Secondary Plan; to which Councillor Orlikow agreed to report back.
