REASON FOR THE REPORT

- The applicant is proposing to subdivide and rezone the land from a "R2" Residential Two-Family District to a “RMF-L” Residential Multi-Family (Large) District in order to support the addition of eight (8) units to the basement of an existing apartment building. The rezoning will bring the building into compliance for density. The subdivision will consolidate the existing seven (7) lots into one lot.
- Rezoning applications require a Public Hearing as per the *Development Procedures By-law* and *The City of Winnipeg Charter.*
- The Report is being submitted for the Committee’s consideration of the development application at the Public Hearing.

IMPLICATIONS OF THE RECOMMENDATIONS

If the recommendations of the Urban Planning Division are concurred in, the property will be rezoned and subdivided.

SITE DESCRIPTION

- The subject property, currently zoned "R2" Residential Two-Family, is located on the east side of Burnell Street, one block south of Ellice Avenue in the St. Matthews neighborhood of the Daniel McIntyre ward.

- The subject property is 28,034 sq. ft. in size.

- The property currently contains an apartment building with 80 units.

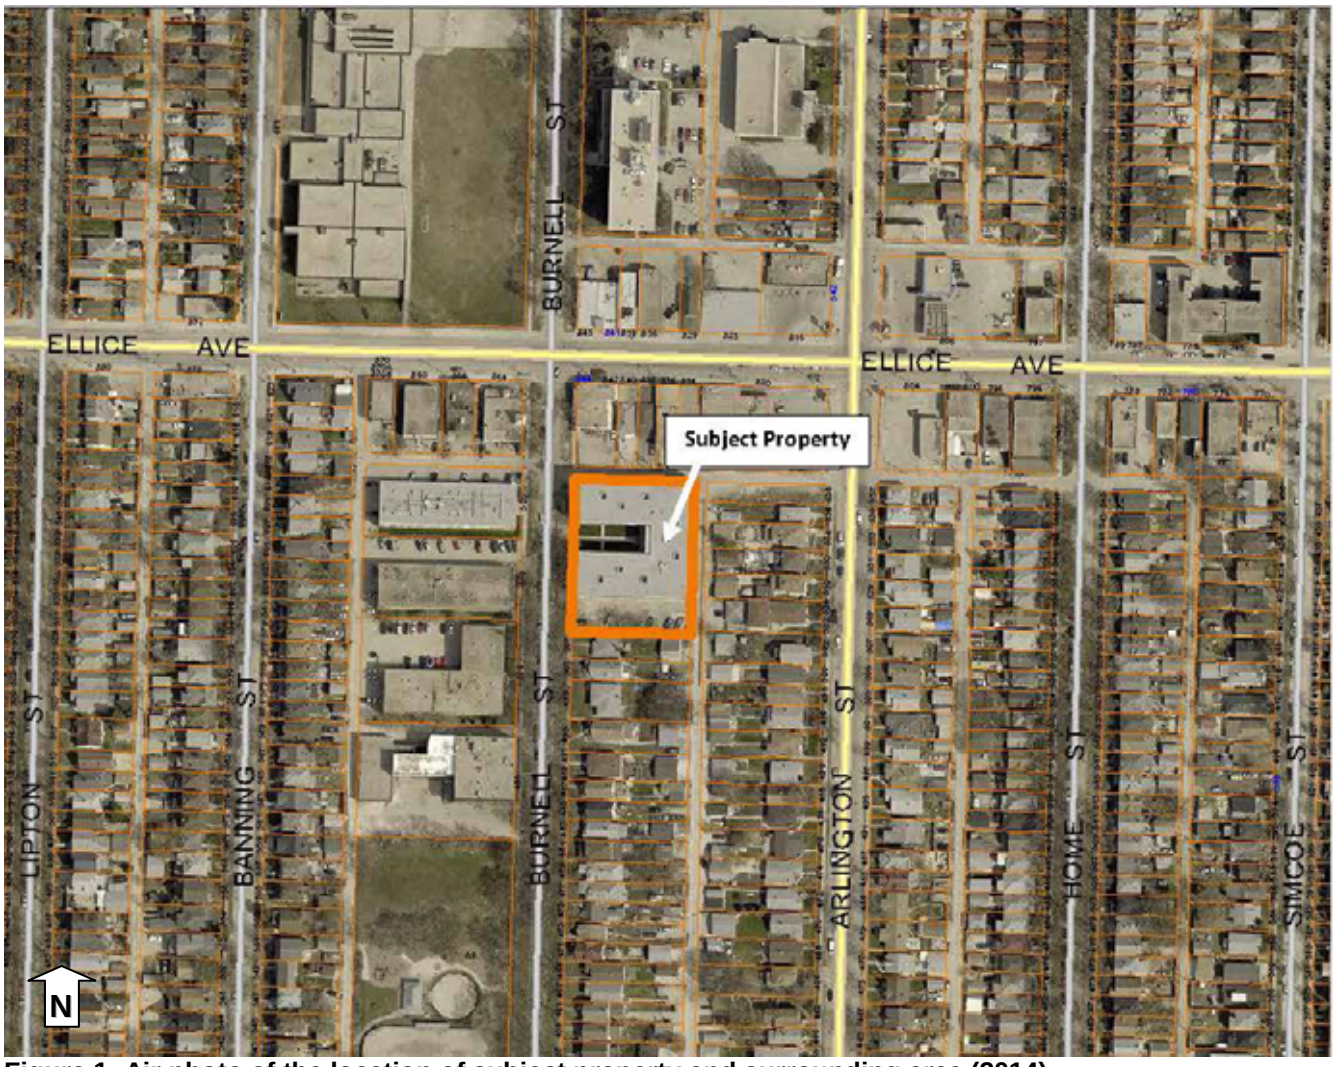

Figure 1: Air photo of the location of subject property and surrounding area (2014).

The immediate area is characterized primarily by a mix of housing types and densities, as well as commercial, office and mixed use a block north on Ellice Avenue. The site is located close to regular transit service one block north on Ellice Avenue and one block east on Arlington Street. Immediately adjacent land uses include:

North: Commercial, office and commercial/residential mixed uses zoned “C2” – Commercial Community

South: Single family residential uses zoned “R2” – Residential Two-Family

East: Single family, two-family and vacant land uses zoned “R2” – Residential Two-Family

West: Multiple family uses zoned “R2” – Residential Two-Family

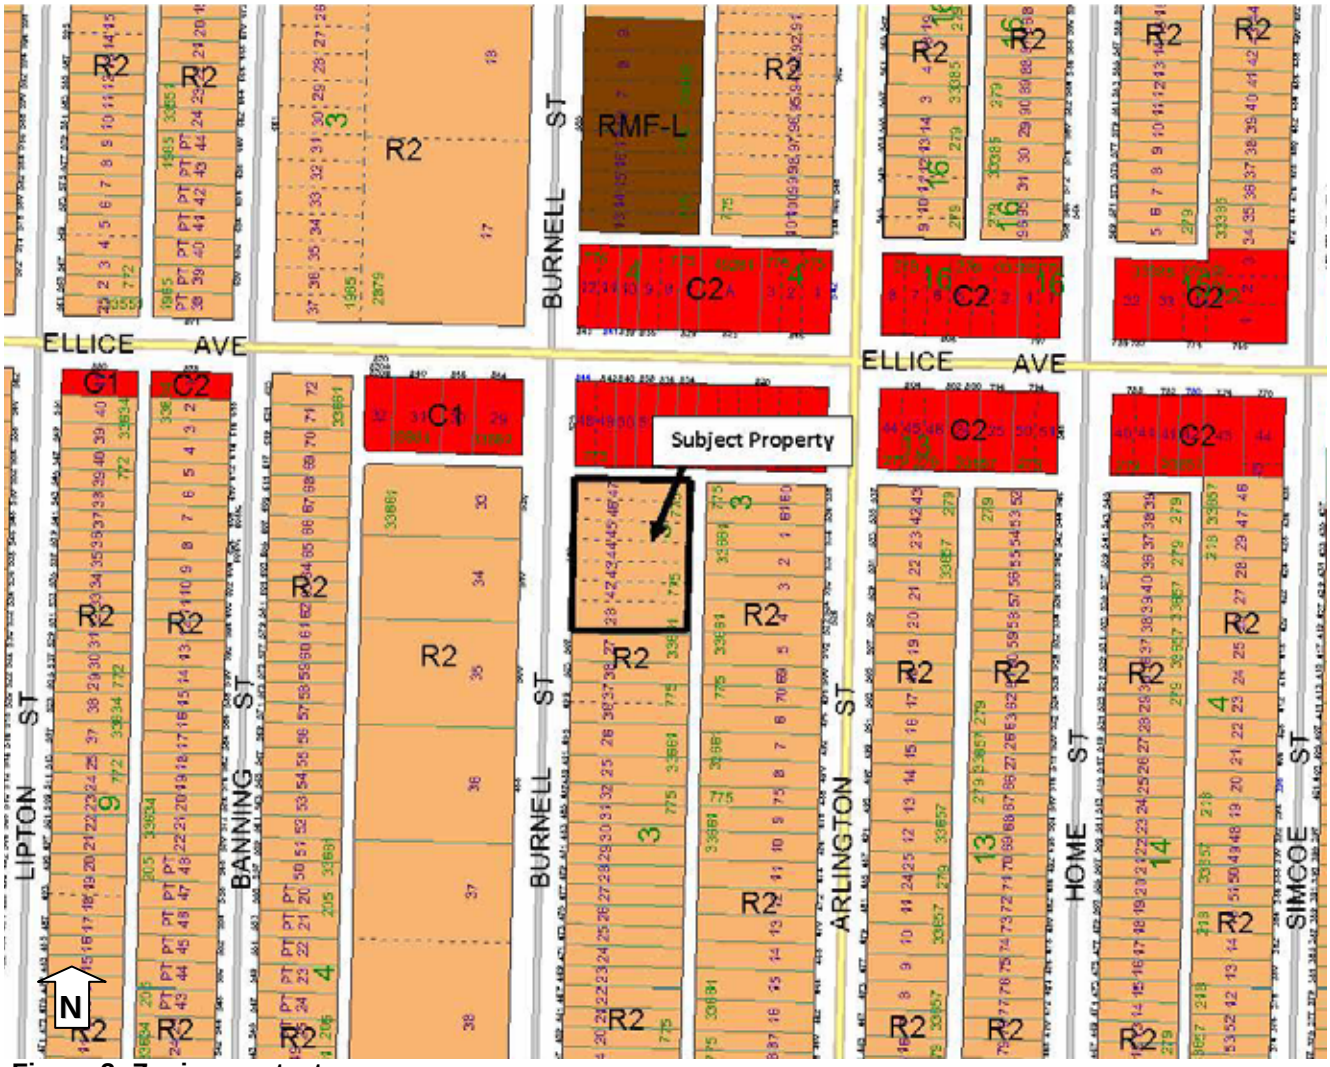

Figure 2: Zoning context

DESCRIPTION OF THE PROPOSED DEVELOPMENT

The applicant seeks a rezoning and subdivision in order to add eight (8) units to an existing 80- unit multiple family apartment building, and to consolidate the existing seven (7) lots that are currently on the title.

Reason for application

The existing apartment building exceeds the number of units that are allowed in the "R2" District, and it therefore has a non-conforming density. Adding units to the building triggers a need to rezone the property to RMF-L, which is the only district that can accommodate the desired number of units on this lot. Rezoning to "RMF-L" will bring this property and its number of units into compliance with the Winnipeg Zoning By-Law.

ANALYSIS AND ISSUES

OurWinnipeg

The applicant indicates that the units in this building are to be rented at affordable levels similar to existing suites in the building. OurWinnipeg (Section 01-4) supports affordable housing.

City of Winnipeg Housing Policy

The City of Winnipeg Housing Policy encourages retention of affordable housing, rental units, and infill development (Policy B2).

Complete Communities Direction Strategy

As per the Complete Communities Direction Strategy, the proposed development falls within Areas of Stability – Mature Communities policy area. Key policies guiding development within Areas of Stability include:

- Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complimentary to the existing scale, character and built form.
- Support Complete Communities by ensuring diverse and high quality housing stock.
- In order to meet the full life-cycle of housing needs within the community, promote a mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.

This proposal adds a moderate amount of density to an existing older apartment building that has been a fixture within the neighbourhood for more than 100 years (built in 1914).

The additional units will not be noticeable from the street. The development provides added rental opportunities in an area that has a demand for rental accommodation.

Daniel McIntyre/St. Matthews Housing Plan 2013-2017

The Daniel McIntyre/St. Matthews Housing Plan has goals which reflect these three main areas of concern, as well as the need for advocacy and education. Goals relevant to this development are as follows:

- Stabilize and increase the number of units of housing available in the Daniel McIntyre/St. Matthews neighbourhoods, while maintaining the current ratio of rental units to owner-occupied units.
- Ensure that housing reflects the mixed-income characteristics of the Daniel McIntyre/St. Matthews neighbourhoods, and is financially accessible to all households.

This development complements the above goals of the Housing Plan.

Parking and transportation

Due to space limitations on the lot, there is no opportunity to increase the provision of parking spaces. The subject property is however in very close proximity to regular east/west transit service (Ellice Avenue – 60m away) and north/south transit service (Arlington Street – 60m way). In addition, the property is one block away from a bike lane (St. Matthews Avenue) and a proposed Neighbourhood Greenway (Banning Street). Cycling is common in the area as is use of transit services and consequently, it is possible to live in this location without owning a vehicle.

The applicant indicates that a group has signed a 20 year lease on the building and that most residents of the building do not own vehicles.

In lieu of providing additional parking, the Urban Planning Division is recommending that the applicant construct a bicycle lock up facility within the building for a minimum of 12 bicycles.

Site improvements

As part of the rezoning, the applicant has agreed to upgrade the garbage dumpster area with an enclosure, add trees and seating the courtyard, and add wrought-iron fencing and shrubs in front of the parking area to screen it from the street. These site plan adjustments will enhance the appearance of the property from the street and from the lane.

SUMMARY

The Urban Planning Division supports the rezoning and subdivision for the following key reasons:

- The proposal adds eight (8) affordable residential units to an existing building in a Mature Community, helping to address Winnipeg's rental supply shortage.
- The change in units will not be noticeable from the street.
- The applicant is providing bicycle lock up facilities for a minimum of 12 bicycles.
- The applicant has agreed to provide site improvements including trees, seating and fencing.

RECOMMENDATIONS

The Urban Planning Division recommends that the application be approved and that the subject property be rezoned to a "RMF-M" Residential Multi-Family (Medium) District.
