COMMUNITY COMMITTEE RECOMMENDATION:

On December 13, 2016, the City Centre Community Committee concurred in the recommendation of the Winnipeg Public Service and recommended to the Standing Policy Committee on Property and Development, Heritage and Downtown Development:

1. That the Winnipeg Zoning By-law No. 200/2006 be amended by rezoning the subject land as shown on Schedule "A" for File DAZ 208/2016 dated November 1, 2016 to an "R2" Residential Two-Family District.

2. That a ten percent (10%) dedication be made by a payment of a sum of money to the City in lieu of the requirement for land dedication based on the increase in market value of the land.

3. That in the event the application is not proceeded with expeditiously and the by-law is not enacted within twenty-four (24) months after adoption of the report by Council, the matter shall be deemed to be concluded and shall not be proceeded with unless an extension of time is applied for prior to the expiry of this twenty-four (24) month period and the extension is subsequently approved by Council.

4. That the City Solicitor/Manager of Legal Services be requested to prepare the necessary rezoning by-law and forward the same to Council for all three (3) readings.

5. That the City Solicitor/Manager of Legal Services be requested to do all things necessary for implementation in accordance with the terms of The City of Winnipeg Charter.

The City Centre Community Committee provided the following supporting reasons for its recommendation:

1. This complies with the plan that we just passed. There's been a lot of work on this over almost two years in terms of going back and forth and making a lot of efforts to have this

fit in in to the context of the neighbourhood. These plan design guidelines have only just gone through Council within weeks and I'd like to see how they work.

2. I think the Planning Department has given a pretty good explanation in terms of design guidelines. We brought in the design guidelines to prevent monster houses. This is not a monster house. This could be the size and footprint of a single family house. And it's 30 feet at the side of the neighbour.

3. I think this is a reasonable, moderate increase in density on a corner lot – it's not mid-block, it's a corner lot.

4. It's difficult having anything go next door to you. It's difficult having any kind of change whatsoever. This could be torn down and put back up as a single family house of the exact same size and it would still be as disruptive to the neighbour because there's construction and there's something new going in there that's larger, but I haven't heard anybody saying that we shouldn't be increasing the density; it doesn't seem to be the issue. The units don't seem to be the issue and the issues of the size and the scale appear to be addressed by the design standards so I'm willing to support that.
