EXECUTIVE SUMMARY

The Downtown Residential Development Grant Program (the "DRDGP") is intended to promote the development of multiple family housing in the downtown area of the City of Winnipeg.

The DRDGP was introduced in spring 2010 and the DRDGP By-law No. 77/2010 (the "By-law") was adopted by Council on July 1, 2010. The By-law established "grids" which are used to calculate maximum grant amounts for rental and condominium residential development projects, based on unit tenure (condominium vs. rental), size (e.g. number of bedrooms) and value (assessed value or monthly rental amount).

The data (value) in those grids are to be updated bi-annually for condominium assessed values, and annually for median market rent ("MMR") rates for the City. Updates are required to determine maximum grants under the DRDGP for applicants who are eligible for grant payment (i.e. who have completed projects in 2016) and subsequent years for this program.

RECOMMENDATIONS

1. That Council enact a by-law to amend The Downtown Residential Development Grant Program By-law No. 77/2010 (draft amending By-law attached as Schedule "A") to provide updated values in the grant eligibility grids for the year 2016 that determine maximum grants for rental and condominium projects under the Downtown Residential Development Grant Program.

2. That the proper officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

REASON FOR THE REPORT

Since this report proposes to amend a By-law and only Council can amend by-laws, this report must be considered by Council.

IMPLICATIONS OF THE RECOMMENDATIONS

The formula used to update the grid for condominium units is based on information received from the Assessment and Taxation Department on changes to city-wide condominium assessed values between general assessment years. The overall increase in city-wide condominium assessed values between the two general assessments (reference years of 2012 and 2014) was 6%. Therefore the grid amounts for condominium values in the new grid being introduced to the By-law are increased by 6% over the existing grid for eligible applicants that completed, or will complete, their project in 2016 and 2017.

The maximum grant amounts for apartment rental units would increase under the new grid that is being recommended by the Public Service. This grid is based on MMR, determined by the Province of Manitoba through information received from Canada Mortgage and Housing Corporation (based on its rental survey of the City of Winnipeg). The Province provides the grid containing this information to the City annually. Accordingly, this grid needs to be updated annually and will be updated again when the Province provides the grid for 2017.

If the recommendations of the Public Service are concurred in, the Public Service will notify all eligible applicants under the DRDGP of the updated maximum grant amounts.

HISTORY/DISCUSSION

On June 23, 2010 City Council enacted the DRDGP By-law, the objective of which is to promote the development of multiple family housing in the downtown area of the City of Winnipeg. Approved applicants are eligible for grants up to fifteen (15) times the sum of the incremental municipal taxes and the community revitalization levy (Provincial Education related taxes) for rental units. Approved condominium projects are eligible for grants up to ten (10) times the sum of the incremental municipal taxes and the community revitalization levy (Provincial Education related taxes).

On April 27, 2011 City Council approved an increase to the maximum subscription limit from $10,000,000 of education taxes and $10,000,000 of municipal taxes to $20,000,000 of education taxes and $20,000,000 of municipal taxes (whichever subscribes first), subject to amendment of the operating agreement between the City and the Province of Manitoba.

Final grant amounts for all eligible projects are calculated based on the lesser of the incremental taxes or maximum grant amounts.

Subsection 4(2) of By-law No. 77/2010 states:

Grants for apartment buildings:

"4(2) Subject to subsections (4), (6) and (10), the total amount of the grant for apartment buildings shall be calculated as:

(a)(i) the net present value of fifteen (15) times the sum of the incremental municipal taxes and the community revitalization levy of the project in the first full calendar year following the year in which the project is complete as set out in section 8;

or

(b)(i) an annual amount equal to the sum of the incremental municipal taxes and the community revitalization levy of the project in the first full calendar year following the year in which the project is complete as set out in section 8, for a maximum of 15 years, beginning in the year in which the project is complete as set out in section 8…"

Clause 4(3) of By-law No. 77/2010 states:

"4(3) Subject to subsections (4), (7) and (10), the total amount of the grant for condominiums shall be calculated as:

(a)(i) the net present value of ten (10) times the sum of the incremental municipal taxes and the community revitalization levy of the portion of the project which is classified for assessment purposes as Residential in the first full calendar year following the year in which the project is complete as set out in section 8;

or

(b)(i) an annual amount equal to the sum of the incremental municipal taxes and the community revitalization levy of the project in the first full calendar year following the year in which the project is complete as set out in section 8, for a maximum of ten (10) years, beginning in the year in which the project is complete as set out in section 8…"

Clauses 4(4)(a) and (b) of By-law No. 77/2010 states:

Maximum grants:

"4(4) Notwithstanding subsections (2) and (3), the maximum amount of the grant for any project shall not exceed the following:

(a) for condominiums that were completed in 2014 or 2015, as determined by section 8, the amount per dwelling unit as determined by the type, size and assessed value of that dwelling unit as set out in the grid contained in Schedule A, which is attached to and forms part of this By-law; and

(b) for rental apartment buildings that were completed in 2015, as determined by section 8, the amount per dwelling unit as determined by the type, size and rent per month of that dwelling unit as set out in the grid contained in Schedule B, which is attached to and forms part of this By-law."

Maximum grant amounts are reflected in a grid that considers the tenure, size and value of multiple family housing developments. Final calculations of grant amounts require the most

current assessed value and MMR for the year in which the project is completed (i.e. receives occupancy permits and is compliant with zoning, fire and by-law enforcement requirements).

The grid amounts for apartment rental units were initially set in 2010 and were subsequently amended in 2011, 2012, 2014 and 2016 to keep pace with changes in MMR, which are set annually. Changes to the maximum grant amounts paid for condominium units are based on changes to assessed values every two years; general assessments were conducted in 2010, 2012 and 2014 and those numbers are reflected in the current grid.

The intention from the outset of the program was to update the maximum grant amounts annually for rental projects and bi-annually for condominium projects; and therefore these maximum grant amounts will fluctuate during the lifespan of the DRDGP.
