- The proposed new lots would have frontage onto John Bruce Road East, and both lots would have lot widths of 50 ft. and lot areas of 5423.2 square feet each.
- Detailed plans of development have not been included with the application.

- The Special Boundary Conditions of Zoning By-law 200/2006 would have to be varied to establish the proposed Lots. Application for approval of these variances has been made under File DAV 17-104379/D and a report on this application has been submitted for consideration by the Riel Community Committee.

ANALYSIS AND ISSUES

ZONING BY-LAW 200/2006

"R1-E" Residential Single-Family Estate District

- The "R1-E" district requires: a minimum lot area of 20,000 square feet, a minimum lot width of 25 feet, side yards of 15 feet, front yards of 30 feet, and rear yards of 25 feet. The maximum permitted building height is 35 feet, and the maximum lot coverage is 30 percent.

"R1-M" Residential Single-Family Medium District

- The "R1-M" district requires: a minimum lot area of 3500 square feet, a minimum lot width of 25 feet, side yards of 4 feet (unless lot width is less than 40 feet), front yards of 15 feet (unless lot width is less than 40 feet), and rear yards of 25 feet. The maximum permitted building height is 35 feet and maximum lot coverage is 40 percent.

OURWINNIPEG AND COMPLETE COMMUNITIES

- *OurWinnipeg* is the City's development plan and *Complete Communities* is a "Direction Strategy" of *OurWinnipeg* that provides additional directions and policies on land use and development in the city.
- Under the *Complete Communities Direction Strategy* the proposed development is located within the Areas of Stability – Recent Communities policy area. The Key Direction of *OurWinnipeg* and *Complete Communities* that applies to the Areas of Stability policy area states:
    - *Enhance the quality, diversity, completeness and sustainability of stable neighbourhoods and expand housing options for Winnipeg's changing population.*
- The first and third policies of Direction 1 of Section 04 of *Complete Communities* state, respectively:
    - *Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complementary to the existing scale, character and built form.*
    - *Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments.*
- Infill development is discussed within the Recent Communities introduction under the *Complete Communities Direct Strategy*, that states:
    - *Recent Communities can also accommodate some infill development to increase housing choice, increase options for aging in place, and to maximize the use of existing infrastructure.*

- The proposed plan of subdivision and rezoning would facilitate single-family developments, which would result in two (2) new houses being added to the area and a more efficient use of existing and future infrastructure. Therefore, the proposed plan of subdivision and rezoning would comply with the aforementioned Key Direction.

COMPATIBILITY WITH EXISTING NEIGHBOURHOOD AND SURROUNDING USES

- As stated above, the Areas of Stability – Recent Communities policy area under the *Complete Communities Direction Strategy* supports infill development that is context sensitive and complementary to the existing scale, character, and built form of the neighbourhood.
- The immediate neighbourhood area is characterized primarily by single-family residential dwellings that have lot widths ranging from 40 ft. to 60 ft. The proposed lot widths of 50 ft. and lot areas of 5423.2 sq. ft. would be compatible with the existing scale and character of residential properties on this street (see Figure 3).
- The proposed development would be consistent with the surrounding neighbourhood context because it would enable the development of single-family dwellings, which is a typical land use in the area in which the site is located. As such, the Urban Planning Division is supportive of the proposed plan of subdivision and rezoning.

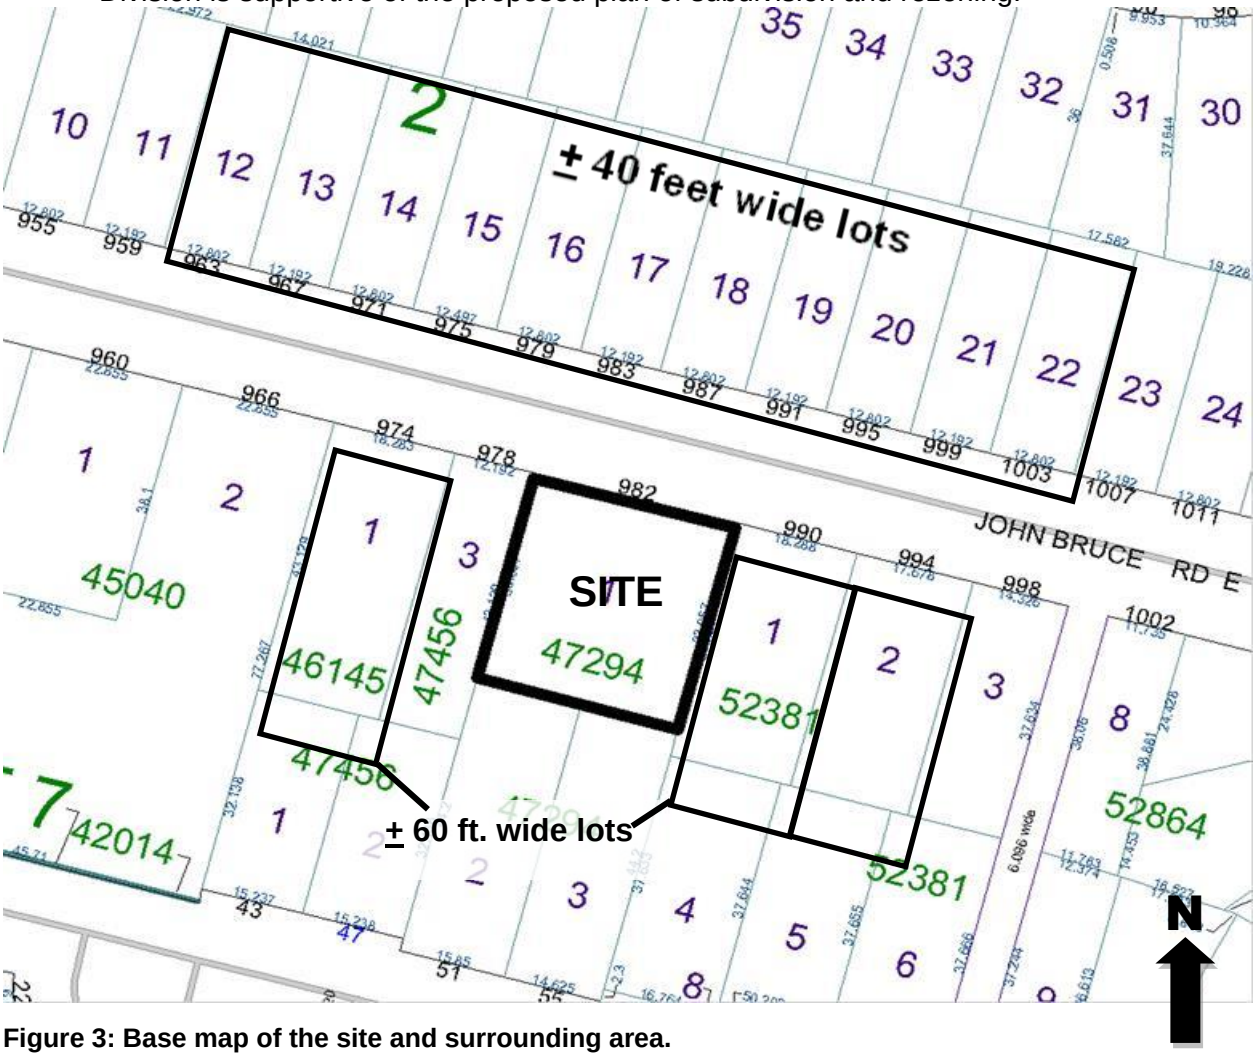

Figure 3: Base map of the site and surrounding area.

RECOMMENDED ZONING AGREEMENT
Plan Approval

- The Urban Planning Division is recommending that final plans be submitted to the Director of Planning, Property and Development for review prior to the issuance of a development permit on the site. The inclusion of this clause will allow the Urban Planning Division to review final plans before development takes place for the proposed development to ensure the development uses a variety and balance of high-quality exterior cladding materials, including horizontal and/or vertical articulation elements, and strategically uses colour to complement the façade design. It is also recommended to ensure that the houses have some distinguishing design characteristics that set them apart from one another, avoiding a “cookie cutter” style of development.

REASONS FOR THE RECOMMENDATIONS
The Urban Planning Division recommends approval because the proposed plan of subdivision and rezoning are consistent with *OurWinnipeg* and *Complete Communities*, and are compatible with the surrounding neighbourhood character and context.
