ANALYSIS AND ISSUES

WAVERLEY WEST SOUTHWEST NEIGHBOURHOOD AREA STRUCTURE PLAN

- The subject site is located within Residential Land Use Policy Area of the Waverley West Southwest Neighbourhood Area Structure Plan. The Residential Land Use policies are as follows:

  5.1.1 Composition

  (1) Single-family Residential shall be the predominant land use.

  (2) Multiple-family Residential, including higher density Multiple-family Residential, Community Scale Commercial, Local Commercial, Non-Retail Commercial, Institutional,

Recreational and other compatible uses shall be permitted in the vicinity of Neighbourhood Nodes and the primary commercial area (see also section 5.3).

(3) Multiple-family Residential (including Higher Density Multiple-family Residential), Local Commercial, Non-Retail Commercial, Institutional, Recreational and other compatible uses shall be permitted adjacent to Waverley Street. Multiple-family Residential, including higher density Multiple family Residential, shall be permitted adjacent to the Perimeter Highway.

(4) Where Residential is located adjacent to the perimeter highway, other buffering tools such as berming, landscaping and fencing shall be implemented.

(5) The general categories of uses identified under section 5.1.1 may be refined through the Development Application process.

- The Waverley West Southwest Neighbourhood Area Structure Plan establishes a target density range to ensure that residential development occurs within an acceptable range that is compatible with the adjacent neighbourhoods; meets the needs of the housing market; and reduces the spatial consumption of land and servicing costs. The density range for single family and multi-family residential uses are addressed as follows:

  5.2.1 Range

  (1) The Residential density shall be a minimum of 14.8 units per Gross Developable Hectare (6.0 units per Gross Developable Acre) and a maximum of 22.2 units per Gross Developable Hectare (9.0 units per Gross Developable Acre).

  (2) Multiple-family Residential shall be overall, a minimum of 37.1 units per Gross Developable Hectare (15.0 units per Gross Developable Acre).

- The site is located within in Neighbourhood Node 3 of the Waverly West Southwest Neighbourhood Area. The Waverley West Southwest Neighbourhood Area Structure Plan states that neighbourhood nodes are intended to act as focal points for the area where multiple-family residential, local commercial, institution, recreational, school and other suitable uses can be located. Relevant policies with regard to Neighbourhood Nodes include the following:

  5.3.1 Composition

  (2) The composition of Neighbourhood Nodes shall be refined and addressed through the Development Application process.

  5.3.2 Design

  (1) The Neighbourhood Nodes should be complimentary to the surrounding area while maintaining a distinct and identifiable character. The Unique Character of each node as outlined arising from the mix of uses at each node […] can be supplemented by distinct landscaping, signage or design features at each node.

- Neighbourhood Node 3 is intended to bring together a number of components including residential land uses, a potential K-8 school site, the Greenway System, a roundabout and two collector roads, one of which provides a second roadway linkage to the Bridgwater Trails neighbourhood.

ZONING BY-LAW 200/2006

"RMF-M" Residential Multi-Family Medium

- The RMF-M zone is intended to accommodate the development of multi-family units in areas with medium to high residential densities. The dimensional standards for multifamily structures in the RMF-M zone are: a minimum front yard of 25 feet; a minimum rear yard of 25 feet; a minimum side yard of 8 feet, and, a maximum building height of 60 feet. The minimum lot area is 9,000 square feet and the minimum lot area per dwelling unit is 800 square feet.

"R2" Residential Two-Family District

- The R2 district is intended to accommodate the development of single and two-family units and where appropriate limited multi-family units in lower density neighbourhoods. The R2 district requires: a minimum lot width of 25 feet, a minimum lot area of 5,000 square feet (2,500 per dwelling unit for two-family dwellings), 4 foot side yards, a front yard of 20 feet, and a rear yard of 25 feet. The maximum building height is 35 feet.

COMPATIBILITY WITH EXISTING NEIGHBOURHOOD AND SURROUNDING USES

- Under the Waverley West Southwest Neighbourhood Area Structure Plan the subject lots are located in the Residential Land Use Policy Area. Policies guiding development in the Residential Land Use Policy Area state that single-family residential shall be the predominant land use. Multiple-family residential and other land uses shall be permitted in the vicinity of neighbourhood nodes, the primary commercial area, and adjacent to Waverley Street and the Perimeter Highway.
- The residential density proposed is 11.13 units per developable acre at 52 units, which will exceed the required minimum of 42.03 units. The proposed development modestly increases the density in a form that is compatible with single-family development, which is the predominant land use in the vicinity of the lots.
- Neighbourhood Nodes are intended to act as focal points for the area. The Public Service encourages lots serviced by a back lane and fronting on a collector road as they create a more active street front which contributes towards establishing the intersection as a focal point for the area and improving the corridor.
- All of the lots being rezoned to R2 are within 400 metres of the collector road (Landover Drive) where Transit service will be provided to the neighbourhood.

RECOMMENDED CONDITIONS

- The Public Service recommends including a condition in the zoning agreement to ensure that back lane parking for the duplexes are developed to permit 2 feet from a parking pad or garage to lot lines in order to help accommodate areas for snow storage.
- Plan approval by the Riel Community Committee is recommended as a condition of approval in order to review the site configuration, landscaping, parking, cladding materials and colour renderings/elevations proposed to ensure the development complements the character and intent of the Neighbourhood Node. It is also recommended to ensure that the houses have

some distinguishing characteristics that set them apart from one another avoiding a “cookie cutter” style of development.

RECOMMENDATION

The Urban Planning Division recommends **approval** for the following reasons:

- The subject rezoning complies with the Residential Land Use policies of the Waverley West Southwest Neighbourhood Area Structure Plan.
- The proposed development modestly increases the density in a form that is compatible with single-family development, which is the predominant land use in the vicinity of the lots.
- All of the lots being rezoned to R2 are within 400 metres of the collector road (Landover Drive) where Transit service will be provided to the neighbourhood.
