EXECUTIVE SUMMARY

The Winnipeg Public Service generates an Annual Report on workplace safety for Council. Performance measures used in the report are Lost Time Injury (LTI) Rates and Workers Compensation Board (WCB) costs. These are the primary indicators used by the City to measure workplace safety progress.

The 2017 Council Report – Workplace Safety concludes that;

- Since 2008 organizational Lost Time Injury (LTI) Frequency performance has been relatively consistent, averaging 7.0 lost time injuries per 100 workers per year.
- Organizational LTI Frequency was 7.3 in 2017; higher than average (7.0) but within standard deviation for the reporting period (2008 – 2017).
- Organizational LTI Severity was 1188 in 2017; higher than average (1098) but within standard deviation for the reporting period (2008 – 2017).
- Workers Compensation Board (WCB) related costs increased to $8.3 million in 2017 from $8.2 million in 2016, primarily due to a 15% increase in medical expenses.
- The majority of LTI in 2017 were strains/sprains (58%) most commonly caused by falls/slips/trips and overexertion.
- Since the *2016 Council Report – Workplace Safety*, the City has implemented a number of initiatives to enhance workplace safety, including; a plan to become SAFE Work Certified, an awareness campaign for preventing slip and fall incidents and a machine SAFEguarding project.
