Figure 2: Zoning of the site and surrounding area.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

- The applicant is proposing to rezone the property from an "R2" Residential Two-Family District to a "C2" Commercial Community District.
- The intent is to construct a new one storey building on the subject site (a social service facility use) that will be used in conjunction with the existing Oyate Tipi Cumini Yape building located directly north of the subject site and separated by a public lane. The site plan show three parking stalls to support the development.
- The proposed "C2" Commercial zoning district will accommodate a social service facility as a permitted use.
- An associated variance application (DAV 18-119486D) has been applied for (See Planner's report for details).

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY:

- Under the *Complete Communities Direction Strategy* the proposed development is within the Areas of Stability – Recent Communities policy area. With regard to this proposal, the key policies guiding the development of Areas of Stability include:
    - Support low to moderate change in low-density neighborhoods through development and redevelopment that is complementary to the existing scale, character and built form.

- In order to meet the full life-cycle of housing needs within the community, promote mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.
- Support a mix of commercial services and employment uses that serve the local community.

LAND USE BY-LAW

ZONING

Current Zoning: "R2" Residential Two-Family District

- The Residential Two-Family (R2) district is intended to accommodate the development of single and two-family units and where appropriate limited multi-family units in lower-density areas.

Proposed Zoning: "C2" Commercial Community District

- The Commercial Community (C2) district is intended to accommodate more intensive commercial sites that do not have a local or neighbourhood orientation. The district is intended to include attractive commercial, institutional, recreational, limited residential and service facilities needed to support the surrounding neighbourhoods and the broader community. C2 districts are generally located in Community or Regional mixed use centres or along Community or Regional mixed use corridors.

COMPATIBILITY WITH THE SURROUNDING NEIGHBOURHOOD

- The *Complete Communities Direction Strategy* encourages a mix of commercial services and employment uses that serve the local community.
- The subject use, a non-profit organization dedicated to supporting women and children who are rebuilding their lives and their homes, already exists on the site immediately north of the subject site. The proposed building will provide more space for Oyate Tipi Cumini Yape who wishes to provide more impact by helping more people. Specifically the building will be used for the sales of refurbished furniture and household items, storage space for items donated to the agency, and training space for community outreach programs.
- The rezoning will facilitate the development of a lot that currently sits vacant, thereby returning the property to a productive use.
- It is intended that the building will contain a storefront along the McGregor St frontage. This will help to reinforce the pedestrian oriented streetscape established along both Selkirk Ave and McGregor St. The building directly east of the subject site, across McGregor St, is built up to the front property line as will be the proposed building.
- The applicant requires variances relating to landscape requirements and parking. The site is limited in size, which poses significant challenges to development without these variances (See planner's report for DAV 18-119486/D).
- The scale of the proposed development is consistent with the surrounding context and form. It must also be noted that the final design of the building will require review and approval by the public service and the Lord Selkirk West Kildonan Community Committee to ensure the building fits the existing context.

- The Urban Planning Division does not foresee any negative impact on adjoining properties.

RECOMMENDED ZONING AGREEMENT

Plan Approval

- The Urban Planning Division is recommending that final plans be submitted to the Lord Selkirk-West Kildonan Community Committee and the Director of Planning, Property and Development and the City Centre Community Committee. The inclusion of this clause will allow the Urban Planning Division and the Lord Selkirk-West Kildonan Community Committee to review final plans before development permits are issued. The most important aspect of this review is to ensure the building a relation.

Restriction of uses

- While the "C2" Commercial Community District is an appropriate zoning strict to accommodate the intended use, there are some permissible uses in the "C2" zone that may not be appropriate given the local context as well as the size of the site. Particularly, auto-oriented uses such as auto sales and service; fuel sales; and car wash, to name a few, would not be appropriate at this location. For this reason part of the recommended zoning agreement will prohibit specific uses on the subject site such as the ones named in this section of the report.

LAND DEDICATION

- When a developer rezones and/or subdivides a parcel of land, they are required to submit an application with the City of Winnipeg.
- As a condition of rezoning or subdivision, a developer is required to contribute a portion of the land to be developed to the City for parks purposes.
- The amount of land is not less than 10%.
- The developer is to provide land or 'cash in lieu' as determined by the Planning, Property and Development Department.
- The City is requesting cash in lieu for this application.

RECOMMENDATION

The Urban Planning Division recommends **approval, with conditions** for the following reasons:

- The rezoning to "C2" Commercial District allows for the development and expansion of a social service facility that already contributes positively to north end Winnipeg
- The proposal is consistent and compatible with the surrounding properties; the p*roposed form of building is consistent with that of surrounding properties.*
- *The proposed development will turn a vacant lot into a productive use, which helps revitalize the area.*
