ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY

- *The Complete Communities Direction Strategy* is one of four direction strategies supporting *OurWinnipeg* and has statutory authority as a secondary plan. The strategy guides land use and development in Winnipeg.
- The subject property falls within the "Area of Stability – Recent Community" policy area in the *Complete Communities'* Urban Structure map. Key policies guiding development within Areas of Stability include:
    - Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complimentary to the existing scale, character and built form.
    - Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments.
    - In order to meet the full life-cycle of housing needs within the community, promote a mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.
    - Promote a quality public realm with a high level of accessibility to community services and amenities and opportunities for gathering and social interaction.

- Within recent communities, intense and diverse development will be encouraged in centres and along corridors.

- Under the *Complete Communities Direction Strategy*, the proposed development is located along a Mixed Use Corridor. Our Corridors serve a dual function. On one hand, they are our primary city routes, connecting neighbourhoods and transporting people, goods and services. On the other hand, they serve the additional purpose of accommodating a mix of uses, functioning as vibrant urban places for Winnipeggers to live, work and play. The *Complete Communities Direction Strategy* focuses growth to our Centres and Corridors in a manner that:
  - Provides compact, mixed-use, high-quality urban development;
  - Concentrates people and jobs in areas well served by transit;
  - Concentrates urban development in a built form that helps to optimize existing investment, municipal infrastructure, and facilities; and
  - Encourages a built form that supports a pedestrian-friendly environment.
- Key relevant policies guiding development along Centres and Corridors include the following:
  - Provide a mix of employment, higher-density residential opportunities, retail and service uses that support the needs of and respect the context of adjacent communities.
  - Support development that is sensitive to conserving historically significant features and resources.
  - Promote the highest levels of intensification at significant intersections. Between each centre, lower intensities of commercial, residential and mixed use development are appropriate.
  - Promote the enhancement of existing Community Mixed Use Corridors through moderate intensification.
  - Promote small-scale, fine-grained development that is responsive to the surrounding community context.
  - Support a range of housing opportunities in terms of type, tenure, unit size.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

"R1-M" Residential Single-Family Medium District

- The intent of the "R1-M" zoning district is to accommodate primarily single-family residential development in lower-density areas.
- The R1-M district requires: a minimum lot width of 25 feet, a minimum lot area of 3,500 square feet, side yards of 4 feet, a front yard of 15 feet, and a rear yard of 25 feet. The maximum building height is 35 feet and the maximum lot coverage is 45%.

"M1" Manufacturing Light District

- The "M1" zoning district is intended to provide for light manufacturing, processing, service, storage, wholesale, and distribution operations with all operations contained within an enclosed building with some limited outside storage.

- The dimensional standards for structures in the M1 zone are: a minimum front yard of 25 feet; a minimum rear yard of 25 feet; a minimum corner side yard of 15 feet, and a maximum building height of 50 feet. There are no minimums related to lot area, rear yards, and interior side yards.

"RMF-S" Residential Multi-Family Small

- The RMF-S zone is intended to accommodate the development of multi-family units in areas with medium to high residential densities.
- The dimensional standards in the RMF-S zone are: a minimum front yard of 20; a minimum rear yard of 25 feet; a minimum side yard of 4 feet and, a maximum building height of 35 feet. The minimum lot area is 9,000 square feet and the minimum lot area per dwelling unit is 1,250 square feet.

Reason for Subdivision and Rezoning Application

- The applicant is seeking to separate titles and realign boundaries between the church and the school for reasons related to organizational structure and financing.
- The applicant also seeks to correct the current split zoning, extending the "R1-M" zoning to the entire school site and rezoning the church and four-plex dwelling site to "RMF-S", as multi-family dwellings are not permitted in the "M1" zone.

COMPATIBILITY WITH EXISTING NEIGHBOURHOOD AND SURROUNDING USES

- The portion of the site on which the existing school is located is already zoned "R1-M" and is located next to similarly single family uses. This existing use is complimentary to R1-M uses.
- The portion of the site occupied by the Church and four-plex dwelling is located in close proximity to other multi-family developments zoned "RMF" to the south and southeast.
- The applicant is eliminating the split-zoning and multiple uses on the subject site by establishing two titles and rezoning to bring existing uses into compliance on the property, which is preferred by the Public Service.

PLAN APPROVAL

- The Public Service is recommending that final plans be submitted to the Director of Planning, Property and Development and Riel Community Committee for review prior to the issuance of any development permit on the portion of the lot proposed for "RMF-S" zoning. The inclusion of this clause will allow the Urban Planning Division and the Riel Community Committee to review final plans and design details before development takes place on the site.

LAND DEDICATION

- When a developer rezones and/or subdivides a parcel of land, they are required to put in an application with the City of Winnipeg.
- As a condition of rezoning or subdivision, a developer is required to contribute a portion of the land to be developed to the City for parks purposes.
- The City is requesting cash in lieu for this application.

RECOMMENDATIONS

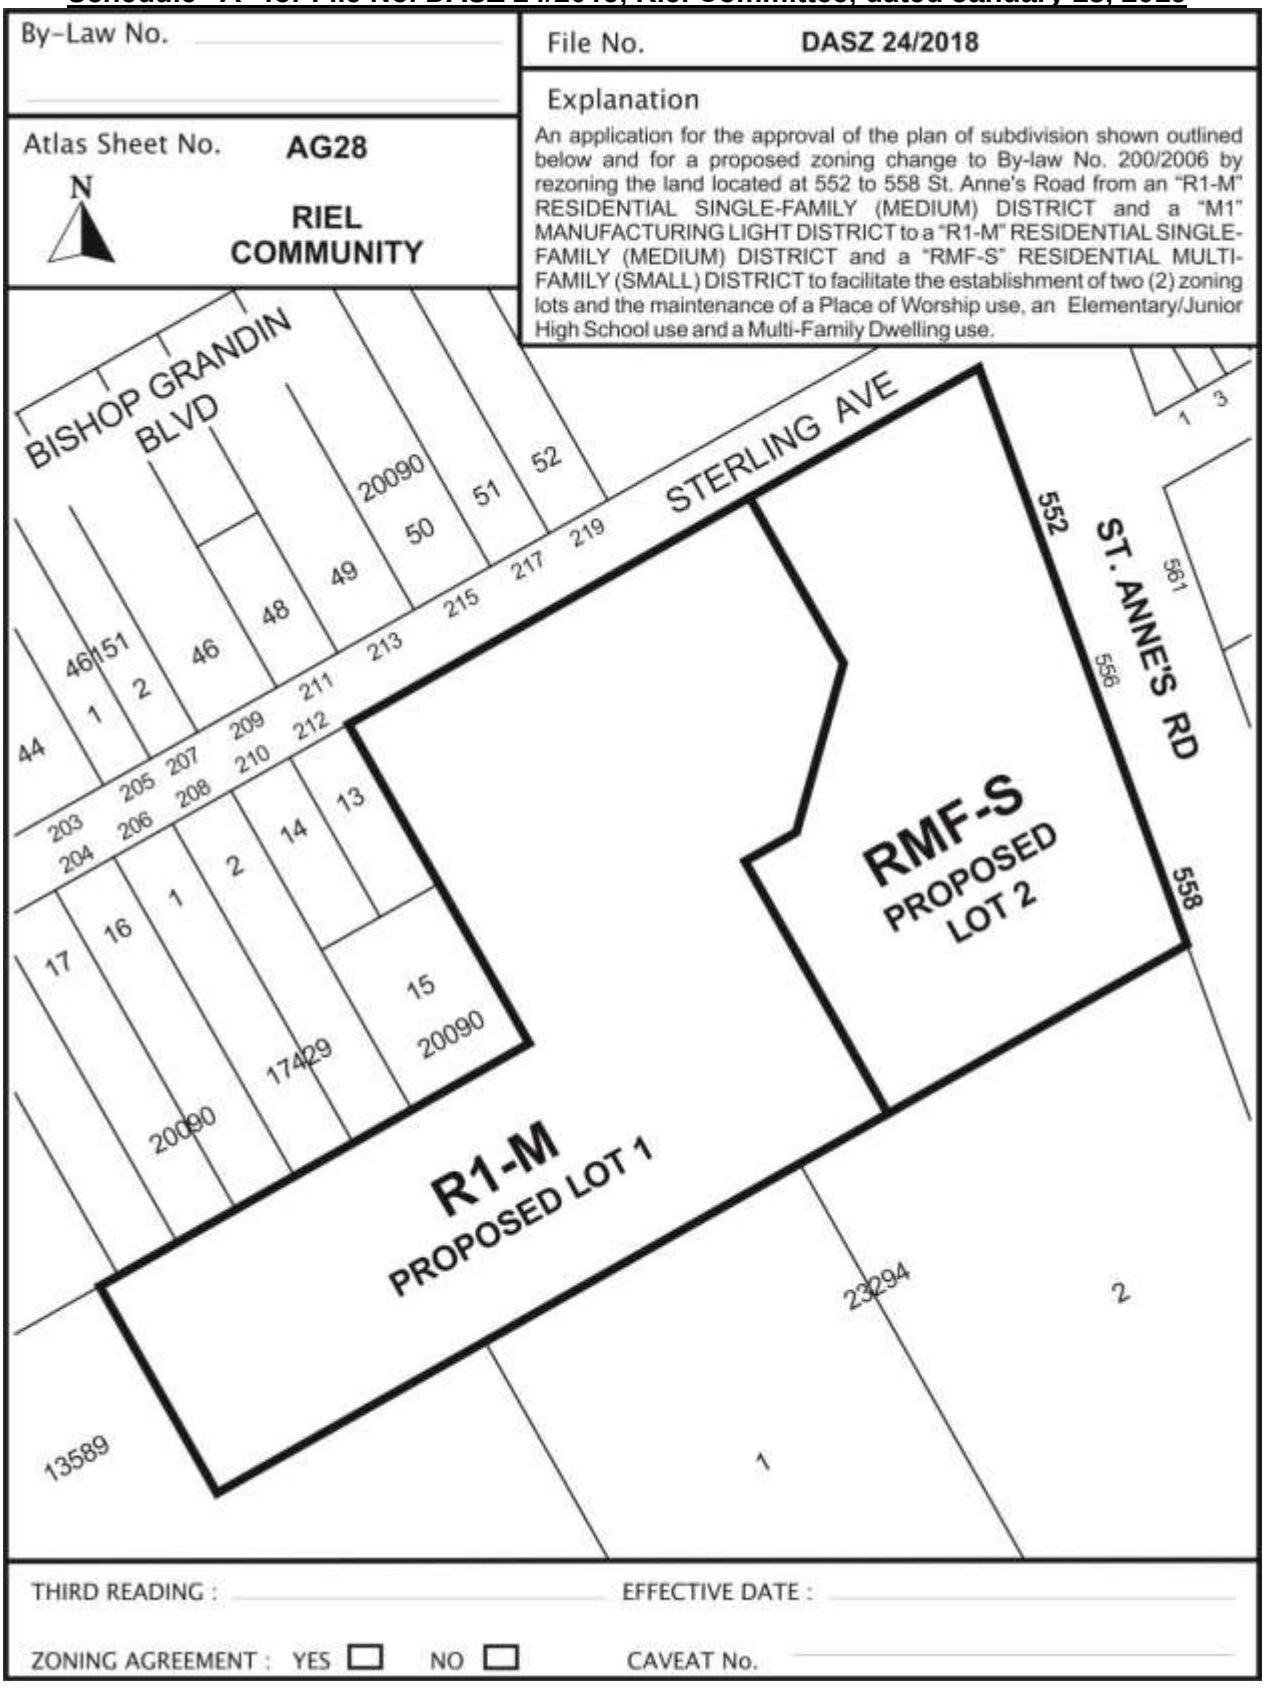

The Urban Planning Division recommends **approval with conditions** for the following reasons:

- The existing uses and the proposed subdivision and rezoning support objectives in the *Complete Communities Direction Strategy* as they promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments; promote a mix of housing type and tenure, promote a quality public realm with a high level of accessibility to community services and amenities and opportunities for gathering and social interaction, and encourage intense and diverse development along centres and corridors.
- The proposed rezoning and boundary realignment eliminates split-zoning and brings existing uses into compliance, facilitating planned and orderly development.
